INTRODUCTION

The Statewide Transportation Improvement Program (STIP) contains Federal Aid projects programmed for Fiscal Years 1996, 1997 and 1998. The projects have been identified through the planning process as important to the state's transportation program.

The STIP includes Highway and Bridge, Bicycle, Pedestrian, Transportation Enhancement, and Public Transportation (transit) projects. Project related activities, such as PE (Preliminary Engineering), ROW (Right of Way) and CONST (Construction) are given for highways, and CAPITAL and OPERATING for public transit. The projects are organized in alphabetical order by Regional Development Center, County and mode of transportation. The STIP format has been standardized with the same information for each project.

The STIP is fiscally balanced, including only those projects with funding available or a reasonable expectation of obtaining funds. Federal funds for Fiscal Years 1996, 1997 and 1998 are program estimates and will not be final until after the federal budget is approved on October 1 of each year.

Projects in the Statewide Transportation Improvement Program emphasize maintenance, safety and improving operations of the existing highways, bridges, and public transportation. The Georgia Department of Transportation is pleased to make this document available. We welcome comments on the STIP. Please send any questions or comments to :
