

GEORGIA DEPARTMENT OF TRANSPORTATION

STATEWIDE TRANSPORTATION IMPROVEMENT PROGRAM

1998

1999

2000

INTRODUCTION

The Statewide Transportation Improvement Program (STIP) contains Federal Aid projects programmed for Fiscal Years 1998, 1999 and 2000. The projects have been identified through the planning process as important to the state's transportation program.

The STIP includes Highway and Bridge, Bicycle, Pedestrian, Transportation Enhancement and Public Transportation (transit) projects. Project related activities, such as Preliminary Engineering (PE), Right of Way (ROW) and Construction (CONST) are given for highways, and CAPITAL and OPERATING for public transit. The projects are organized in alphabetical order by County and mode of transportation. The STIP format has been standardized with the same information for each project.

The STIP is fiscally balanced, including only those projects with funding available or a reasonable expectation of obtaining funds. Federal funds for Fiscal Years 1998, 1999 and 2000 are program estimates and will not be final until after the final budget is approved on October 1 of each year.

Projects in the Statewide Transportation Improvement Program emphasize maintenance, safety and improving operations of the existing highways, bridges, and public transportation. The Georgia Department of Transportation is pleased to make this document available. We welcome comments on the STIP. Please send any questions or comments to :

Georgia Department of Transportation

STIP Financial Plan

The following describes how the STIP Financial Plan(SFP) was developed for Fiscal 1998-2000. The SFP is the spending plan for allocating transportation funding to state and local projects. It addresses a time period of three years, and, by law, is constrained by predicted funding levels. Only those projects or an identified phase (preliminary engineering, rights-of way or construction) of a project which have a reasonable available public or private funding source are eligible for placement in the STIP.

The Fiscal 1998-2000 SFP was developed on the basis of current fund balances and projected 1998, 1999, and 2000 Federal-aid funding. Also considered were current State fund balances and projected State Revenues for each of the three years of the STIP. Also the Transportation Improvement Programs (TIP) and their related funding, developed by the 11 Metropolitan Planning Organizations (MPO), are incorporated into the STIP by reference.

The Fiscal 1998-2000 SFP totals \$2.38 billion with an FY 1998 annual program of \$1.4 billion. This total is broken out into Highway and Transit Funding Sources as described below. Funding for this three-year program includes \$1.94 billion in federal funds, \$359 million in state funds, and \$78 million in local funds. This level of infrastructure investment supports nearly 202,000 jobs in the construction industry. In addition to the construction jobs generated by the program, a well maintained highway system fosters a healthy economy by providing the infrastructure needed for efficient movement of goods and people. Efficient transportation is fundamental to productivity.

HIGHWAY PROGRAMS

Interstate Maintenance (IM) - Funds used for resurfacing, restoration, and rehabilitation of the Interstate Highway System. These funds cannot be used to provide new capacity to the system, nor for construction of new facilities such as rest areas, ports of entry, etc.

National Highway System (NHS) - A system of highways considered most important to interstate travel, national defense, connection with other modes of transportation, and are essential to international commerce. The system includes the current interstate highways and other routes jointly approved by the state and Federal Highway Administration (FHWA).

Surface Transportation Program (STP) - These funds may be spent on any road that is functionally classified as collector or higher. The funds may be used on projects ranging from new construction to resurfacing, and may also be used for transit projects.

Fifty percent of the funds are allocated to urban and rural areas of the state based on population. Thirty percent can be used in any area of the state at the discretion of the State Transportation Board. Of the remaining 20 percent of the funds, ten percent must be spent on highway safety projects and ten percent must be spent on Transportation Enhancement projects. Safety projects include Hazard Elimination, Railroad Crossing, and Railroad Protective Devices.

The Transportation Enhancement Program has been of particular interest to the general public and users of non-traditional transportation related facilities. The State Transportation Board has established the Enhancements Advisory Panel. The purpose of this committee is to recommend policy and programs to the Board to bring about the implementation and operation of the Enhancement program.

Enhancement projects are defined as: "...provisions of facilities for pedestrians and bicycles; acquisition of scenic easements...or historic sites; scenic or historic highway programs; landscaping and other scenic beautification; historic preservation, rehabilitation and operation of historic highway buildings, structures, or facilities (including railroad facilities); preservation of abandoned railway corridors (including the conversion and use thereof for pedestrian or bicycle trails); control and removal of outdoor advertising, archaeological planning and research; and mitigation of water pollution due to highway runoff."

Applications for projects are accepted only from public agencies. Private groups are encouraged to participate by applying through the appropriate public agency. Project sponsors must provide 20% matching funds.

Congestion Management/Air Quality (CMAQ) - These funds are for projects which can be proven to reduce traffic congestion and/or improve air quality in non-attainment areas. Projects such as park and ride lots, signal coordination, and ride-sharing qualify for these funds.

Bridge Replacement (BR) - These funds are for the replacement or rehabilitation of substandard bridges both on and off the federal system. Bridges must have a span of 20 feet and must be listed on the Federal Register with a sufficiency rating of 80 or less for rehabilitation and 50 or less for replacement.

Demonstration (Demo) - Congressionally authorized funds designated for construction of specified projects.

HIGHWAY FUNDING SOURCES

State Funding Sources - The state makes funds available from several sources for matching federal-aid funding. Sources include motor fuel taxes, special fuel taxes(diesel) and 3% state sales tax on gasoline. Eighty-five percent of these fees are kept by the GADOT and used for construction and maintenance of highways. The remaining 15

percent are made available to the cities and counties for local road use in the form of county contracts and state-aid let. Revenues from these sources are expected to grow at about one percent a year. State funds are utilized for a variety of purposes but in the STIP program development, \$326 million of these funds are used to match federal-aid highway.

Federal Highway Funding Sources - The \$1.68 billion in federal funds is based on estimates of federal revenue available to Georgia through the Highway Trust Fund, from carryover funding from the Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991 and on expected new demonstration funds. Georgia's estimated yearly share from the Highway Trust Fund is expected to be about 2.9% of the estimated \$22.1 billion or \$640.9 million. The obligation ceiling for Georgia is estimated to be 80% of this amount. The amounts by fund code are distributed based on 1996 percentages reviewed by Georgia under ISTEA. The above estimates are subject to change based on reauthorization of the next transportation bill and forthcoming new authorization, appropriation and obligation levels.

Local Highway Funding Sources - During the three-year program, an estimated \$45 million in local funds will be needed to match federal-aid for local projects and for limited participation in improvements on the state system.

FY 1998-2000 HIGHWAY PROGRAM FUNDING

The \$2.0 billion federal-aid program for FY 1998-2000 includes \$1.51 billion for improvements to the state highway system, with the remaining \$536 million available for the local roads and projects. The following table summarizes program funding for FY 1998-2000:

**FY 1998-2000 Highway Program Funding
(\$ Millions)**

Fund Source	FY 1998	Total FY 1998-2000	Average Annual FY 1998-2000
Federal Aid	814	1557	519
New Demo Funds	120	120	40
State Funds	185	326	109
Local Funds	24	45	15
Total	1,143	2,048	683

Program Distribution

State Highways	859	1,512	504
Local Roads and Streets	284	536	179
Total	1,143	2,048	683

The primary sources of the \$536 million in federal-aid to local governments are the Surface Transportation Program and the Bridge Replacement and Rehabilitation Program. Local governments also receive federal demonstration funds for specific projects and Congestion Mitigation/Air Quality funds based on project eligibility and selection. Enhancement projects are selected statewide based on the guidance provided through the Georgia Transportation Enhancement Program.

Federal Aid Highway Program FY 1998 (in millions)

Category	Federal Funds	Required State Matching Funds	Total

TRANSIT PROGRAMS

The Georgia Department of Transportation in cooperation with the Federal Transit Administration and the state's public transit agencies work together to develop a program of transit service and facility improvements to enable them to meet their transportation needs.

FTA Section 5307 Program - This program provides funding for capital, planning and operation assistance. Funds are distributed nationwide on a formula basis.

FTA Section 5309 Program - This program offers capital funding for public transportation systems on a discretionary basis.

FTA Section 5310 Program - This program provides funding to private non-profit agencies for capital improvements for the provision of transportation service to elderly and handicapped persons.

FTA Section 5311 Program - This program provides funding to enhance the access of people in non-urbanized areas to healthcare, shopping, education, employment, public services and recreation. Funds are available for capital equipment, operating and administrative expenses.

TRANSIT FUNDING SOURCES

State Funding Sources - The state primary support for matching federal transit funding is general sales tax revenues. One-half of the required twenty percent match is provided by these taxes. State funds are utilized for a variety of purposes but in the STIP program development, \$33 million of these funds are used to match federal-aid.

Federal Transit Funding Sources - The \$263 million in federal-aid funds is partially based on estimates of federal revenue available to Georgia through the Transit Trust Fund and from carryover funding from the Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991 and partially on expected new earmarked funds. Georgia's estimated yearly share from the Transit Trust Fund is expected to be about 4.0% of the estimated \$5.1 billion or \$204 million.

Local Transit Funding Sources - During the three-year program, an estimated \$33 million in local funds will be needed to match federal-aid for local projects.

FY 1998-2000 TRANSIT PROGRAM FUNDING

The \$329 million federal-aid transit program for FY 1998-2000 includes \$179 million in capital, planning and operating funds, \$128 million in discretionary funds, \$4 million for provision of transportation service to elderly and handicapped persons and \$18 million to enhance the access of people in non-urbanized areas to healthcare, shopping, education, employment, public services and recreation and to assist in the maintenance, development, improvement, and use of public transportation systems in rural and small urban areas. The following table summarizes program funding for FY 1998-2000:

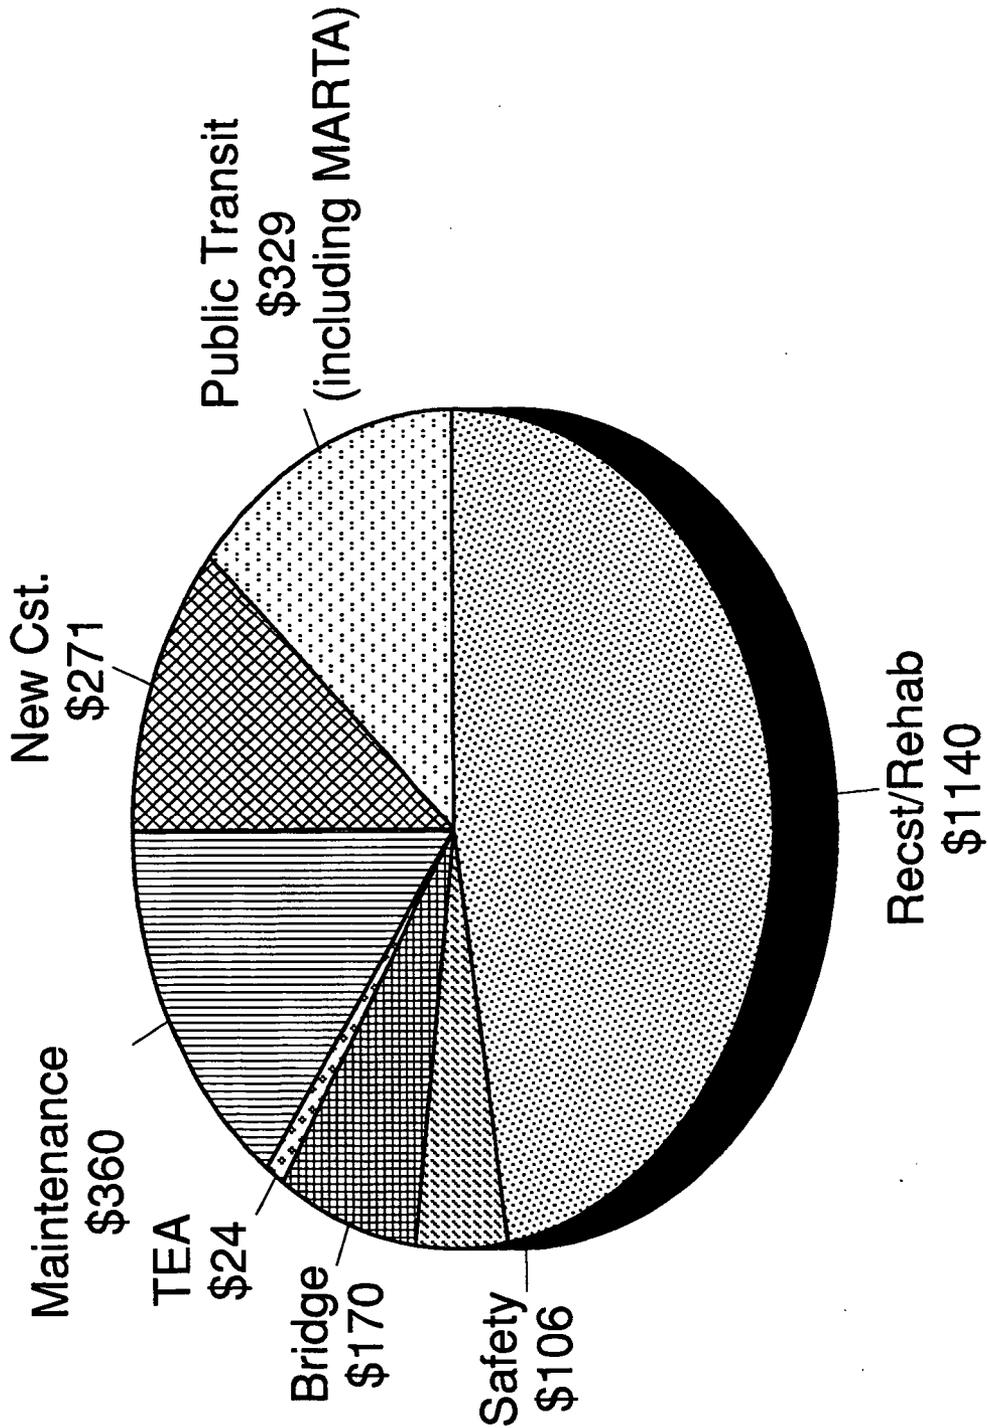

**FY 1998-2000 Transit Program Funding
