

GEORGIA DOT STORMWATER MANAGEMENT PROGRAM

KEEPING GEORGIA'S STREAMS, RIVERS AND LAKES HEALTHY AND CLEAN

We All Have a Part to Play – *Before and After it Rains*

**Rain Check – Before you begin work on your project,
have you checked the following:**

- ✓ Do I have all of the required GSWCC and WECS certifications?
- ✓ Have I reviewed the plans and do I understand them?
- ✓ Do I have the right people in place to install and maintain the BMPs correctly?
- ✓ Do I have a plan to deal with unexpected weather conditions on short notice?

Rain Check – Before it rains on your project, have you checked the following:

- ✓ Have all of my BMPs been installed correctly per the plans?
- ✓ Has all required maintenance been performed on all of my BMPs?
- ✓ Have sensitive areas been covered with a temporary ground cover to minimize erosion?

Rain Check – After it rains on your project, have you checked the following:

- ✓ Have I recorded my daily rainfall amounts?
- ✓ Have I performed all of the required inspections?
- ✓ Have I performed any required water quality monitoring?
- ✓ Have my BMPs weathered the storm?
- ✓ Do I have any BMPs that require maintenance?
- ✓ Do I have any areas of excessive erosion or sedimentation?
- ✓ Has any sediment left my project site?
