

FACTSHEET

STATE ROUTE (SR) 3/NORTHSIDE DRIVE CORRIDOR IMPROVEMENT STUDY

Date: February 6, 2017

Study Location: The study is located in Fulton County, City of Atlanta, on the State Route 3/Northside Drive corridor from I-20 to I-75. The Georgia Department of Transportation (DOT) identification number is PI # 0007557.

Study Description: The Georgia DOT is evaluating the State Route 3/Northside Drive corridor from I-20 to I-75 (approximately five miles) for potential improvements for mobility, safety, bicycle and pedestrian use and access/connectivity to local and regional public transportation services. The set of solutions being explored includes intersection improvements and multimodal enhancements along the corridor.

SR 3/Northside Drive is a vital transportation corridor for a variety of users, including freight vehicles, commuters, students, local residents and business owners. In recent years, there has been substantial development and re-development along the corridor, along with increasing traffic volumes. This has posed challenges to safety and mobility. The purpose of the Northside Drive Corridor Improvement Study is to evaluate which transportation improvements can enhance traffic flow and create a safer environment for all users, while supporting redevelopment and preserving community character.

Current Activity: This study involves four major components:

1. Initial environmental resource assessment along the corridor, including:
 - Ecology – identify streams and wetlands along the corridor,
 - History – identify historic resources (i.e. buildings, properties, communities, etc.), and
 - Other potential environmental resources.
2. Review of transportation and community planning studies that relate to the corridor. Land use changes and development initiatives, along with growth in vehicle, pedestrian, and bicycle travel in the corridor, have led to the need to re-examine how the Northside Drive corridor can be improved to best serve local and regional mobility needs.
3. Seeking and compiling stakeholder comments via an inclusive stakeholder outreach effort and Citizen Advisory Committees to include local elected officials, regional planning partners, faith-based organizations, business and community leaders, educational institutions, and neighborhood planning groups along and in close proximity to the corridor.
4. Consideration of traffic analysis for potential design concepts for key improvements, including:
 - Better network connectivity through signage or other wayfinding connections that are compatible with nearby development, and
 - Improvements to address traffic capacity and functionality of the Northside Drive corridor.

Each of these components, individually and collectively, is focused on building community and technical consensus on a package of potential improvements to Northside Drive.

Study Schedule:

The first phase of this study started in September 2014. The insights gained from this planning phase and general consensus on the type of improvements needed will determine project budgets and detailed schedules. The figure below shows the major steps in the planning phase of the study.

Community Outreach Activities To-Date:

- City of Atlanta (Atlanta Beltline, Departments of Public Works, Planning, Watershed Management, Parks and Recreation, etc.) – January 7, 2015
- Atlanta University Center (Morehouse, Spelman Colleges and AU Center) – January 28, 2015
- Metropolitan Atlanta Rapid Transit Authority (MARTA) – March 4, 2015
- Stakeholder Group Meetings – May 5 and 12, 2015
- West End Neighborhood – July 7, 2015
- Westview Community Organization – August 3, 2015
- Capital View Manor Neighborhood – August 11, 2015
- Legislative Meeting – September 16, 2015
- Public Input Meeting – November 18, 2015
- Meetings with NPU C, D, K, L, M, T, and X – December 2015-January 2016
- Meetings with Berkeley Park, Castleberry Hill, and Home Park – December 2015-January 2016
- Citizen Advisory Committee Meeting #1 – April 2016
- English Avenue Neighborhood Association – July 26, 2016
- Legislative Update Meeting #2 – November 7, 2016
- Citizen Advisory Committee Meeting #2 – November - December 2016
- City of Atlanta Council Transportation Committee – January 11, 2017
- MARTA – January 20, 2017

Background Information:

The Northside Drive corridor is an important north-south route within the City, carrying an average of 23,700 vehicles each day to a dense mix of residential, commercial and industrial properties along and adjacent to the corridor. With interstate interchanges at both ends of the corridor, Northside Drive has several job centers and educational institutions along this five-mile route. Traffic analysis shows that incidents along the corridor have increased by 52% over the last two years. Georgia DOT hopes to enhance safety, improve the corridor's traffic operations and mobility, and reduce traffic incidents and delays.
