

# State Route 6 Access Management Study

## Stakeholder Meeting #3

June 18, 2015

# Agenda

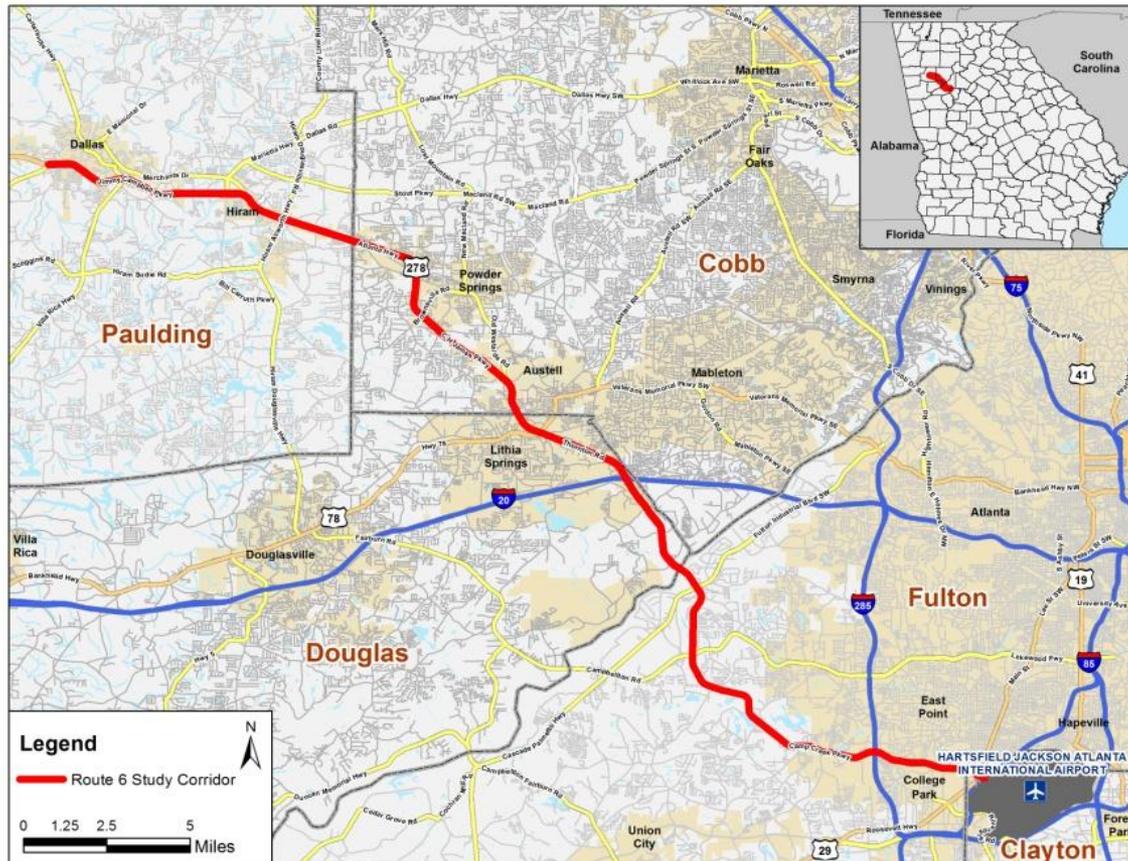

- Meeting purpose & study background
- Corridor analysis
- Recommendations
- Future access policy guidelines
- Discussion & questions

# SR 6 Study Corridor

- The SR 6 study area is a 35-mile major regional travel corridor from Fulton County to Paulding County

# Corridor Vision

*State Route 6 will continue to function as a major thoroughfare in the Atlanta region serving commuters, businesses, residents, freight, pedestrians, and bicyclists. Investments on this corridor will support local and regional economic vitality, mobility, and safety for all users while preserving the essential character of the corridor and minimizing impacts to natural resources. Future access along the corridor will follow a comprehensive corridor plan and will be coordinated among local, regional, and state transportation partners, businesses, and the general public.*

# Study Process

## Winter 2014 – Spring 2014

- Systems inventory & data collection
- ***Stakeholder Meeting #1 – May 22, 2014***

## Spring 2014 – Fall 2014

- Development of corridor vision, goals, objectives, and potential improvement options
- ***Stakeholder Meeting #2 – October 24, 2014***

## Fall 2014 - Summer 2015

- Corridor analysis and development of recommendations
- ***Stakeholder Meeting #3 – June 18, 2015***

## Late Summer 2015

- Final Report

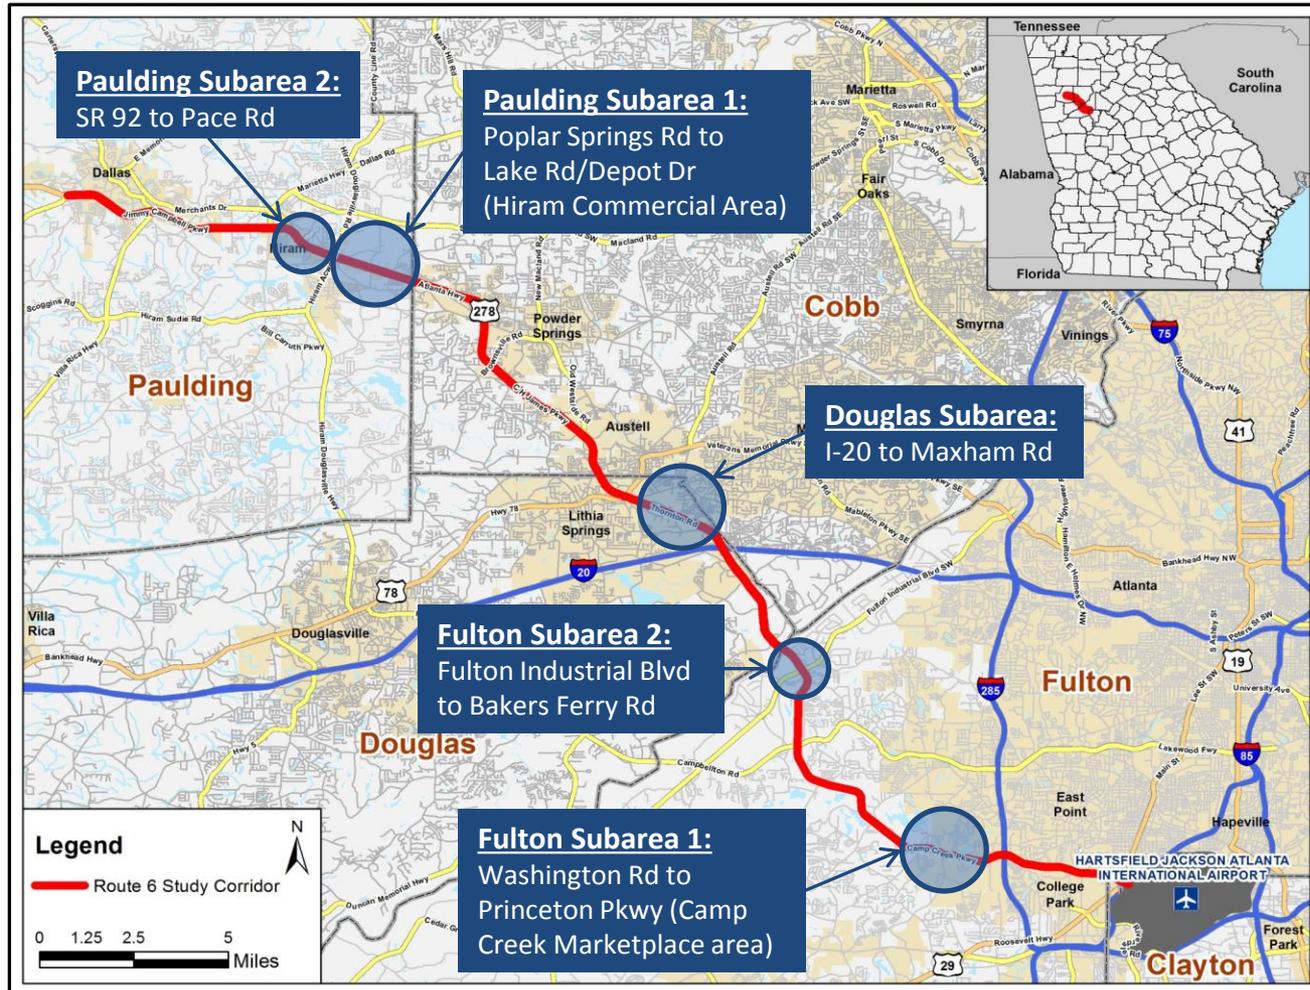

# Analysis

## **Corridor-wide and subarea-focused analyses:**

- Operational improvements
- Alternative intersection designs and other intersection-related issues
- Frontage roads/alternate routes
- Pedestrians, bicycles, and transit
- Freight

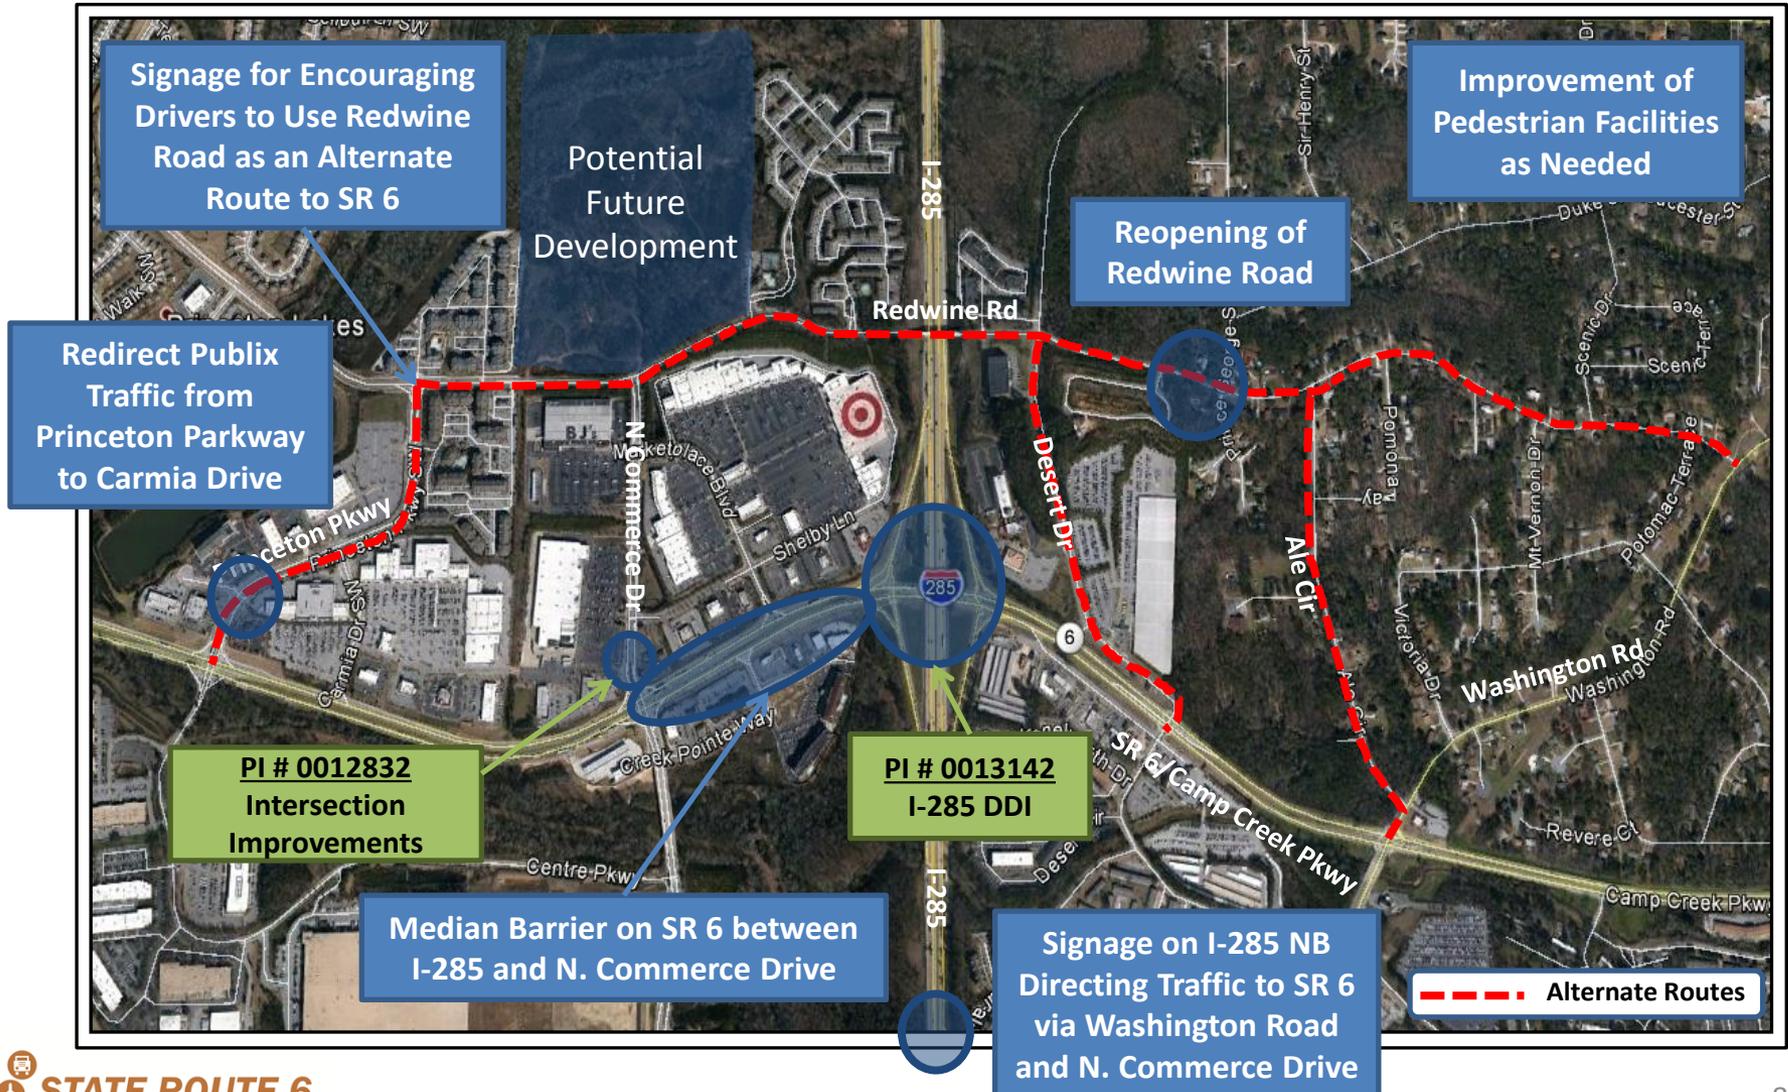

# Subarea Analysis

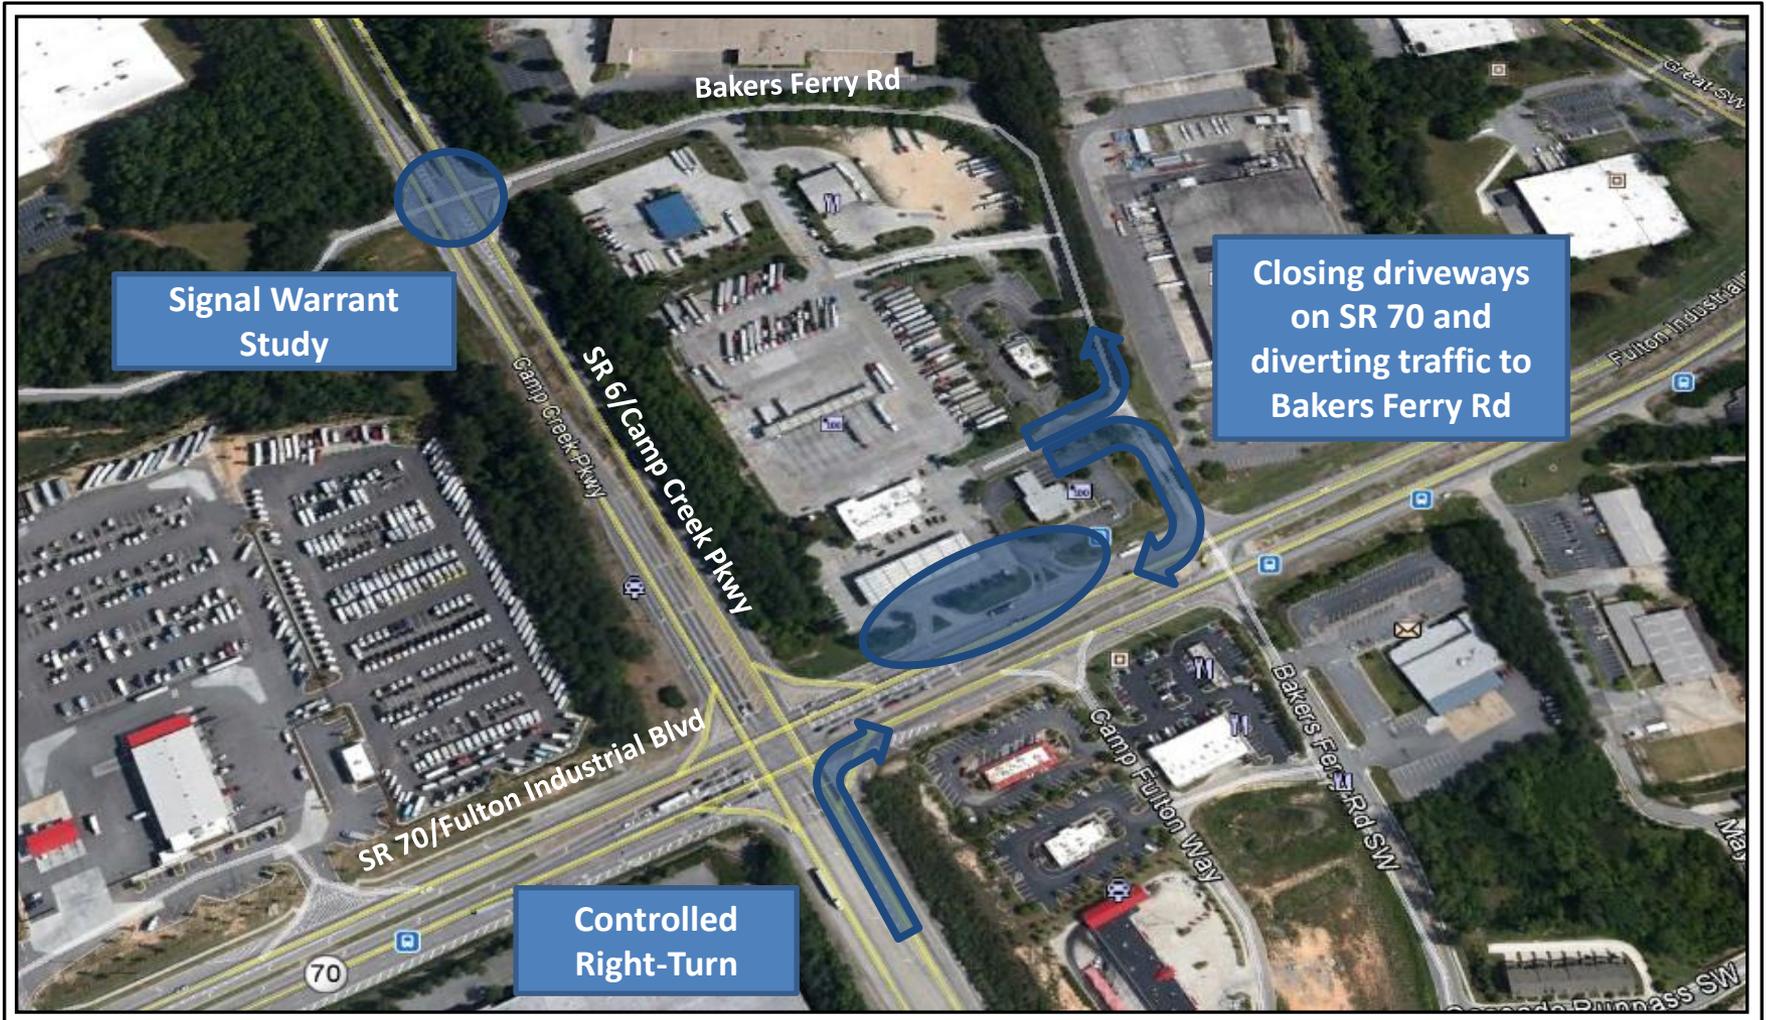

# Highlights of Corridor Analysis (Fulton)

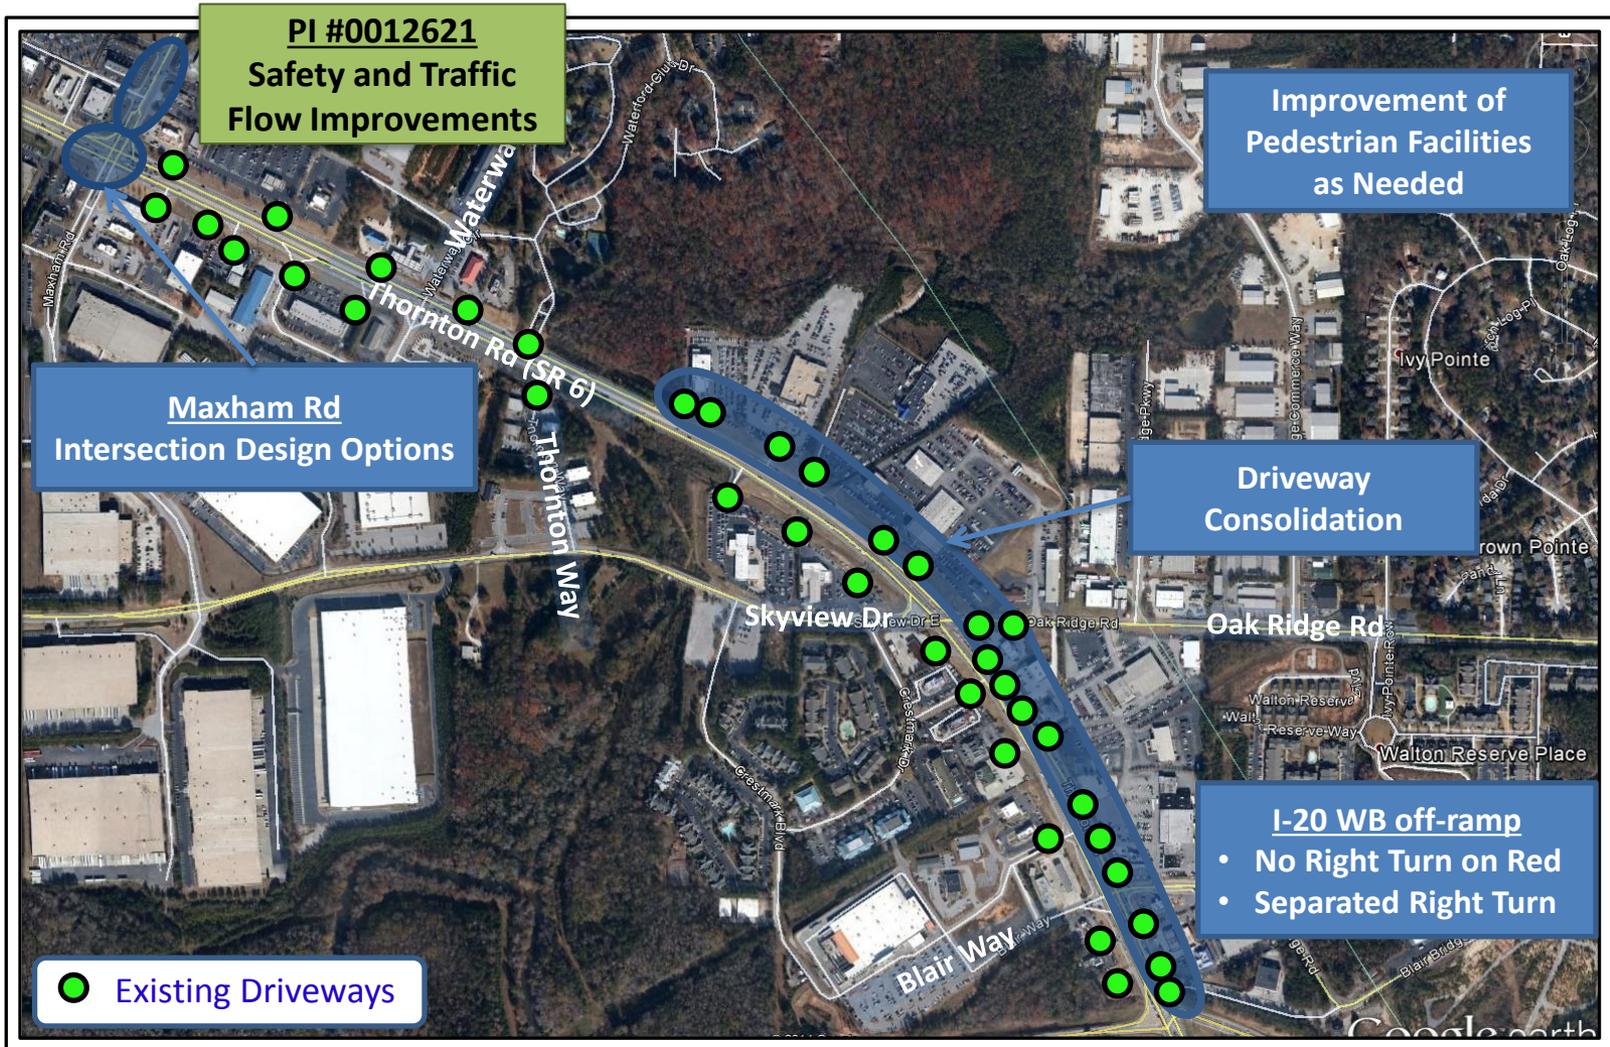

# Highlights of Corridor Analysis (Fulton)

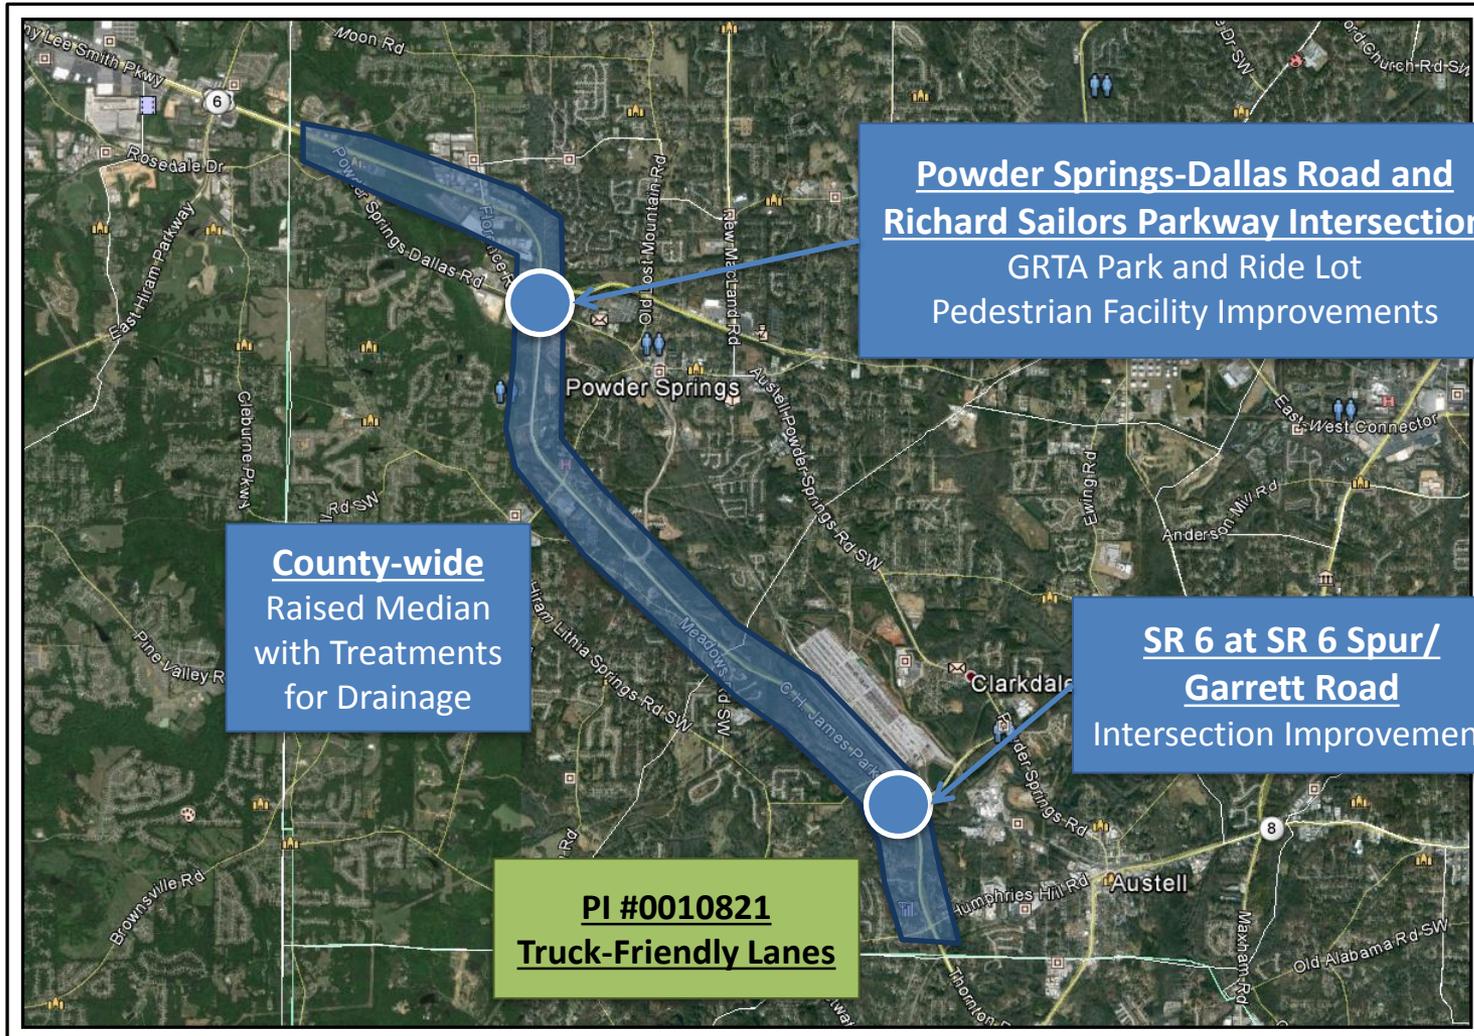

# Highlights of Corridor Analysis (Douglas)

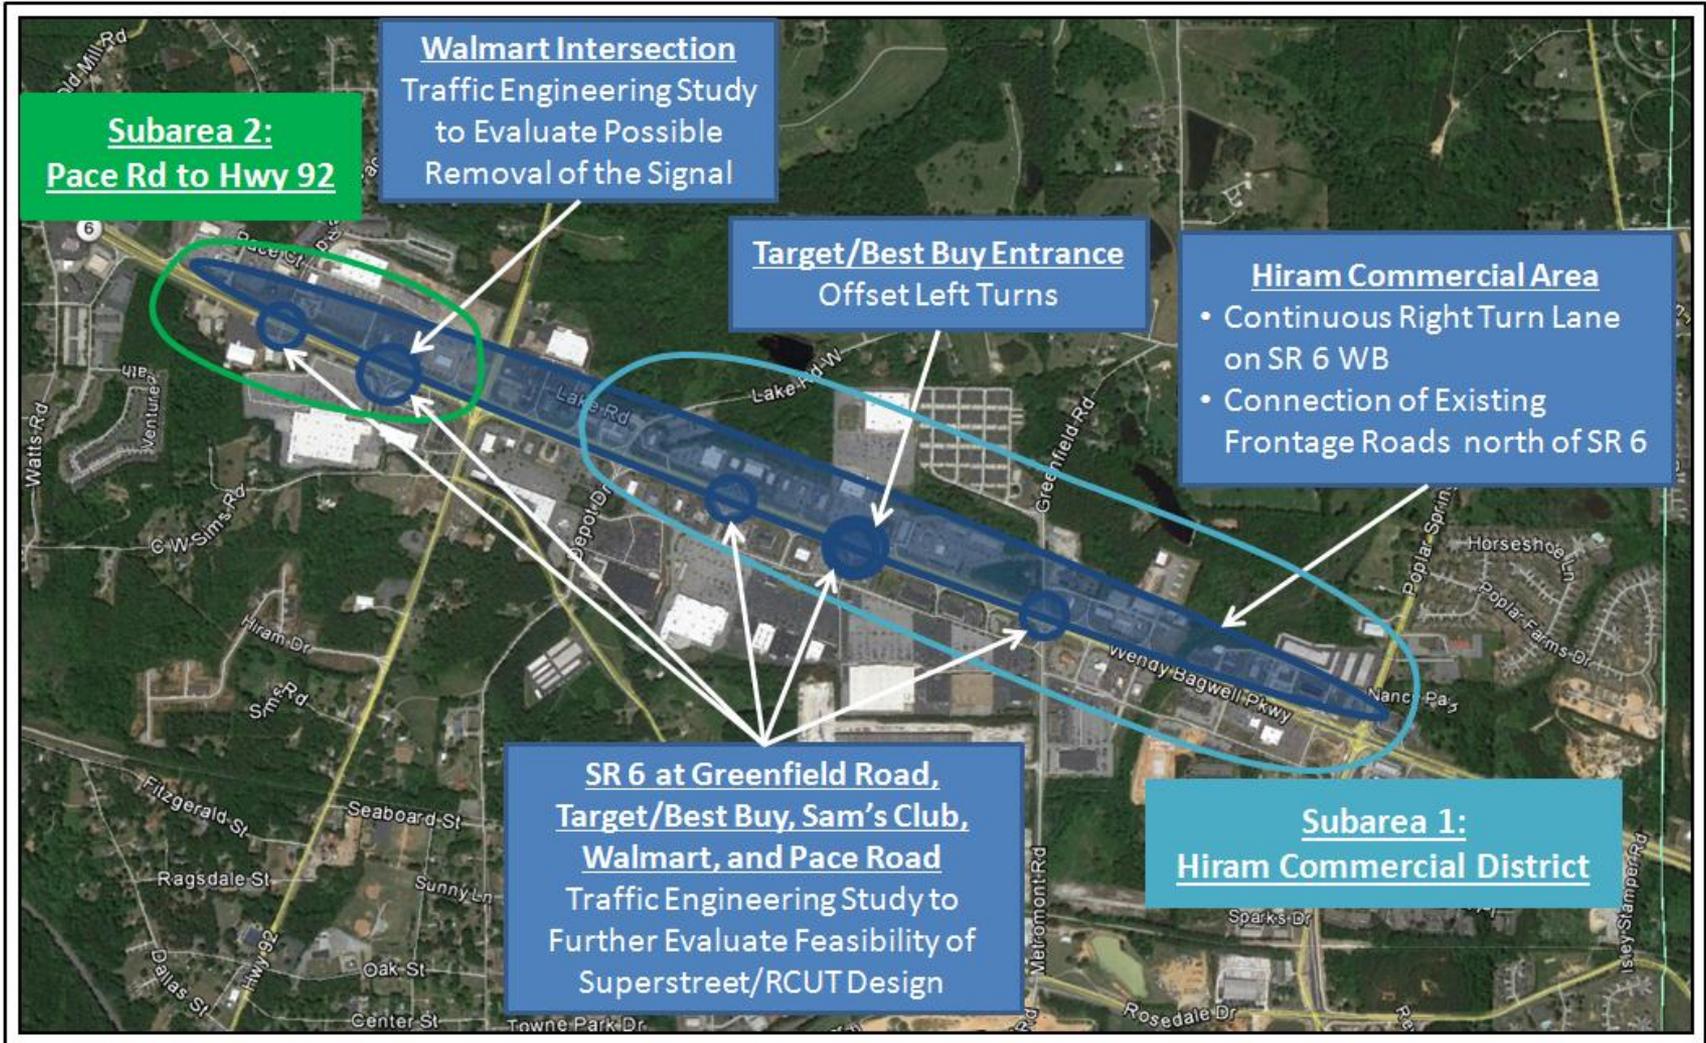

# Highlights of Corridor Analysis (Cobb)

# Highlights of Corridor Analysis (Paulding)

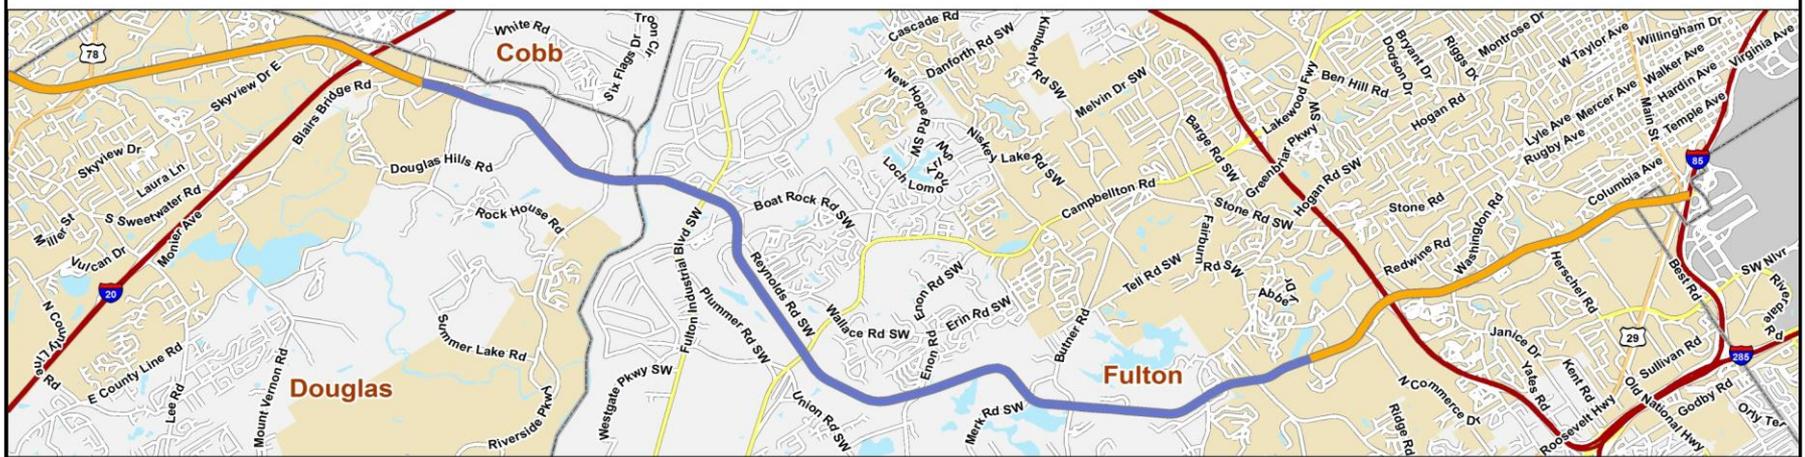

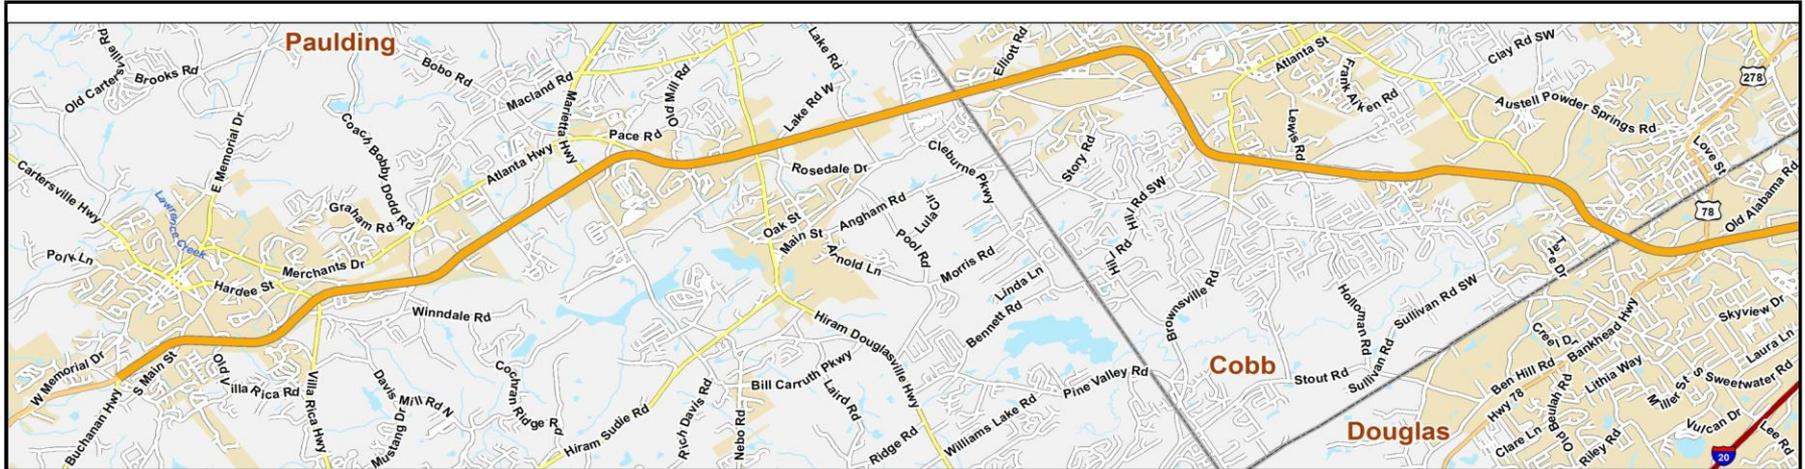

# Corridor-Wide Recommendations

- Future access guidelines
- Access points, driveways, and medians
- Operations
- Intersections
- Frontage roads, alternate routes, and inter-parcel access
- Bicycles, pedestrians, and transit

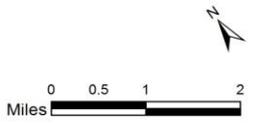

# Future Access Guidelines

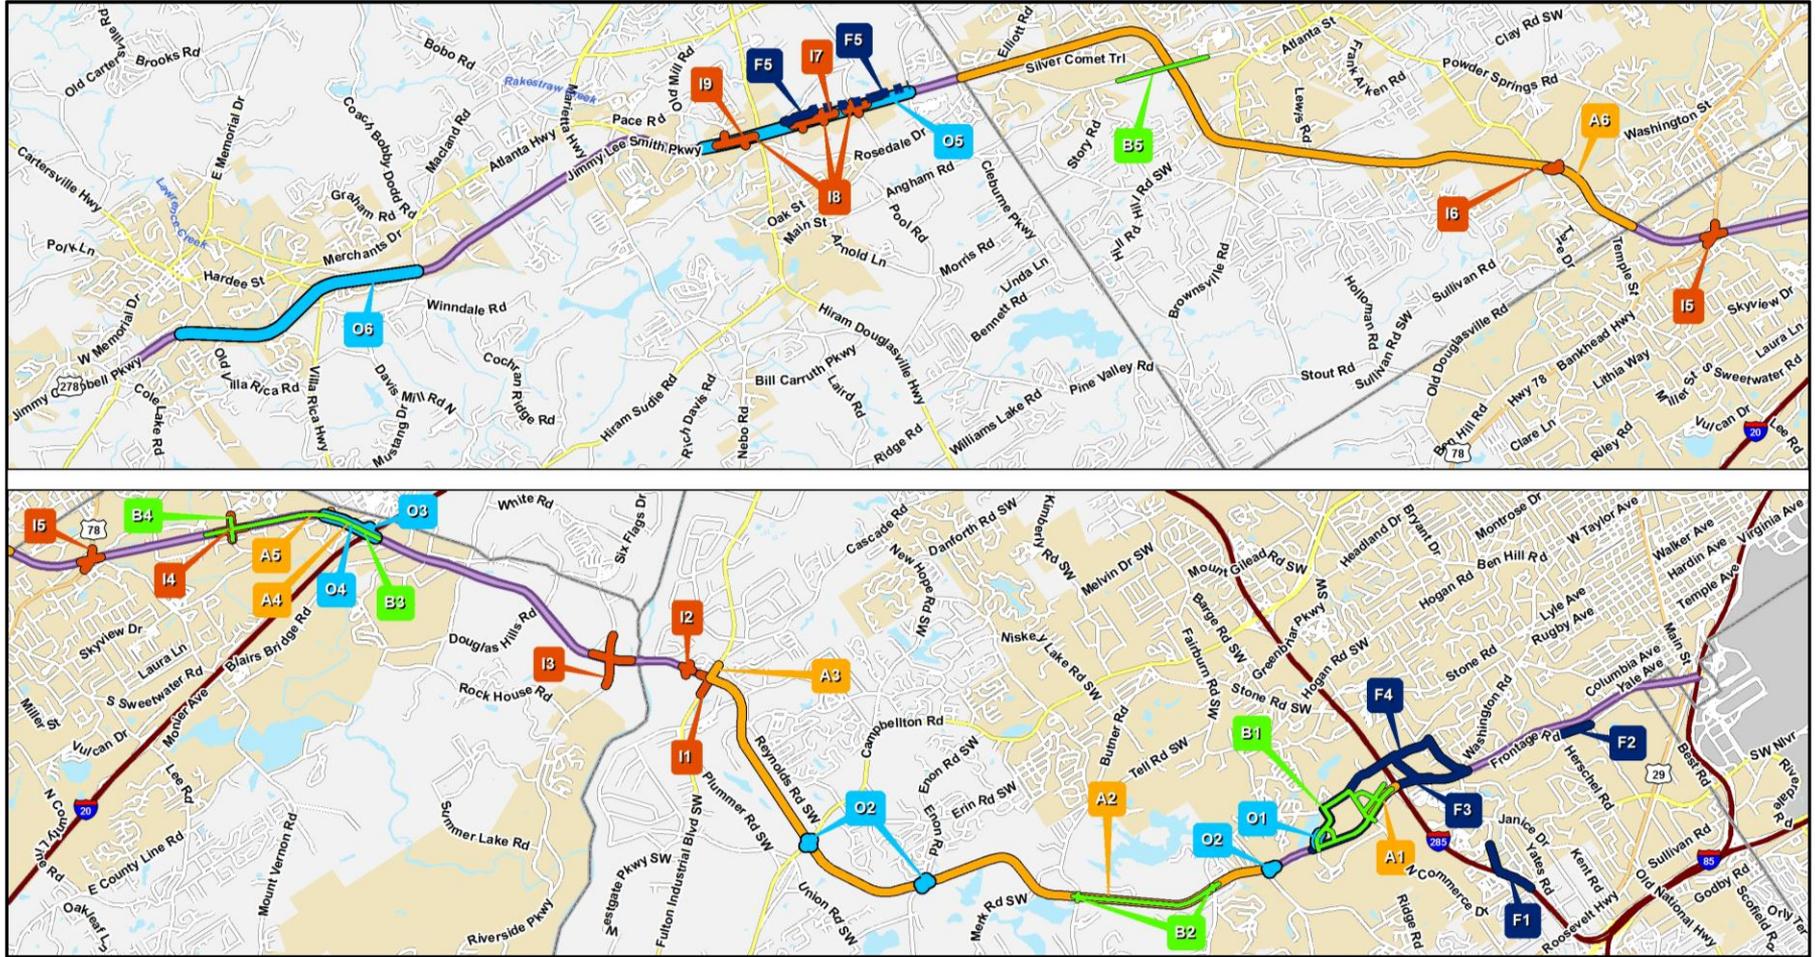

**STATE ROUTE 6**  
ACCESS MANAGEMENT STUDY

- Future Access Categories**
- Use Existing Access Only
  - New Public Access Points Considered on a Conditional Basis
  - Cities

# Recommendations - Overview

**Legend**

- SR 6 Study Corridor
- Access Points, Driveways, and Medians
- Operations
- Intersections
- Frontage Roads, Alternate Routes, and Inter-Parcel Access
- Bicycles, Pedestrians, and Transit
- Cities

Note: Corridor-wide project I10 is not shown on the map.

# Discussion / Questions
