Responsible for providing the people of Georgia with the most efficient transportation systems possible, the Georgia Department of Transportation plans for mass transportation, rail and air transportation needs in the state, and serves as a means of moving people and their goods.

It strives to meet the challenge of providing more than five million Georgians and more than a million annual visitors with the best transportation system available.

The original Interstate System is now complete. The State Highway System is being restored at a higher level of service and many off-system roads and bridges are being improved.
