We All Have a Part to Play – Before and After it Rains

Rain Check – Before you begin work on your project, have you checked the following:

- Do I have all of the required GSWCC and WECS certifications?
- Have I reviewed the plans and do I understand them?
- Do I have the right people in place to install and maintain the BMPs correctly?
- Do I have a plan to deal with unexpected weather conditions on short notice?
Rain Check – Before it rains on your project, have you checked the following:

- Have all of my BMPs been installed correctly per the plans?
- Has all required maintenance been performed on all of my BMPs?
- Have sensitive areas been covered with a temporary ground cover to minimize erosion?

Rain Check – After it rains on your project, have you checked the following:

- Have I recorded my daily rainfall amounts?
- Have I performed all of the required inspections?
- Have I performed any required water quality monitoring?
- Have my BMPs weathered the storm?
- Do I have any BMPs that require maintenance?
- Do I have any areas of excessive erosion or sedimentation?
- Has any sediment left my project site?
