Section 162—Erosion Control Check Dams

162.1 General Description
This work includes furnishing, constructing, and maintaining erosion control check dams.

162.1.01 Definitions
General Provisions 101 through 150.

162.1.02 Related References
A. Standard Specifications
   Section 810—Roadway Materials
B. Referenced Documents
   General Provisions 101 through 150.

162.1.03 Submittals
General Provisions 101 through 150.

162.2 Materials
A. Erosion Control Materials
   Use these materials as needed to control erosion on check dams:
   1. Where required, use any commercial type of woven wire minimum 14 ½ gauge.
   2. Obtain other materials such as logs, brush, stakes, etc., from the Right-of-Way where available.
   3. Place Number 57 stone, where required, at the location and depth indicated on the Plans.
   4. Ensure that material in the earth dams meets the requirements of Subsection 810.2.01.A.1 “Classes” for Class II soil.

162.2.01 Delivery, Storage, and Handling
General Provisions 101 through 150.

162.3 Construction Requirements

162.3.01 Personnel
General Provisions 101 through 150.

162.3.02 Equipment
General Provisions 101 through 150.

162.3.03 Preparation
General Provisions 101 through 150.

162.3.04 Fabrication
General Provisions 101 through 150.

162.3.05 Construction
A. Check Dam Construction
   Construct check dams as follows:
   1. Construct check dams before roadway clearing, grubbing, or grading is done in the affected drainage area. Construct according to the Plans.
Section 162—Erosion Control Check Dams

2. Remove the trees, logs, brush, etc., within the Right-of-Way and the affected area that may be used to construct the check dams. Do not disturb other natural ground cover.

   NOTE: Use only rubber-tired equipment to work in the affected drainage area until after the check dam is in place and completed.

3. Obtain the embankment material for the earth dams from outside the area draining into the protected pond or stream.

4. Immediately after completing the earthwork on the earth dams, place a layer of Number 57 stone on the downstream side of the dam. Immediately grass the remaining portions (top and upstream slopes) of the earth dams.

5. Immediately after grading, grass or stabilize with straw mulch roadway cut and fill slopes that drain toward the check dam drainage area.

6. Leave check dams in place after construction is complete unless otherwise directed by the Engineer.

162.3.06 Quality Acceptance
General Provisions 101 through 150.

162.3.07 Contractor Warranty and Maintenance
Repair the check dams as needed during the life of the Contract.

The estimated number of check dams required is shown on the Plans. Additional check dams may be necessary and shall be constructed when directed by the Engineer.

162.4 Measurement
The number of erosion control check dams measured for the payment is the actual number completed and accepted.

162.4.01 Limits
General Provisions 101 through 150.

162.5 Payment
Erosion control check dams, as measured in Subsection 162.4, “Measurement,” are paid for at the Contract Unit Price. Payment is full compensation for:

- Earth dam construction and compaction
- Required grassing, mulching, and Number 57 stone
- Log dams and dissipaters
- Removal if ordered by the Engineer

Payment for this Item is made as follows:

- 75 percent of the Contract Price is paid when each erosion control check dam is complete in place.
- 25 percent is paid when the Engineer instructs the Contractor that the check dam is no longer required but will remain in place or be removed, whichever applies.

   NOTE: Temporary devices will be left in place at the Engineer’s discretion without a change in cost.

Payment will be made under:

| Item No. 162 | Erosion control check dam—type__ | Per each |

162.5.01 Adjustments
General Provisions 101 through 150.
