Section 600—Controlled Low Strength Flowable Fill

**600.1 General Description**
This work consists of furnishing and placing Flowable Fill as an alternate to compacted soil as approved by the Engineer. Applications for this material include beddings, encasements, and closures for tanks and pipe, and general backfill for trenches and abutments.

**600.1.01 Definitions**
General Provisions 101 through 150.

**600.1.02 Related References**
A. Standard Specifications
   - Section 500—Concrete Structures
   - Section 801—Fine Aggregate
   - Section 830—Portland Cement
   - Section 831—Admixtures
   - Section 880—Water
B. Referenced Documents
   - SOP 10
     General Provisions 101 through 150.

**600.1.03 Submittals**
Mix designs for flowable fill, and other documentation listed in Subsection 500.1.03.

**600.2 Materials**
All materials shall meet the requirements of the following Specifications:

<table>
<thead>
<tr>
<th>Material</th>
<th>Section</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>Fine Aggregate</em></td>
<td>Subsection 801.2.02</td>
</tr>
<tr>

</tr>
</tbody>
</table>

*Note—Gradation requirement is waived.

**Note—High air generators or foaming agents may be used in lieu of conventional air entraining admixtures and may be added at the jobsite and mixed according to the manufacturer’s recommendation.

**600.2.01 Delivery, Storage, and Handling**
General Provisions 101 through 150.

**600.3 Construction Requirements**

**600.3.01 Personnel**
General Provisions 101 through 150.
Section 600—Controlled Low Strength Flowable Fill

600.3.02 Equipment
General Provisions 101 through 150.

600.3.03 Preparation
A. Mix Design

Flowable fill is a mixture of Portland cement, fly ash, fine aggregate, air entraining admixture, and water. Flowable fill contains a low cementious content for reduced strength development.

1. Submit mix designs for flowable fill to the Engineer for approval by the Office of Materials and Research. The following table lists mix design proportion ranges for excavatable and non-excavatable flowable fill:

<table>
<thead>
<tr>
<th></th>
<th>Excavatable</th>
<th>Non-Excavatable</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cement Type I</td>
<td>75-100 lbs/yd³ (45-60 kg/m³)</td>
<td>75-150 lbs/yd³ (45-90 kg/m³)</td>
</tr>
<tr>
<td>Fly Ash</td>
<td>–</td>
<td>150-600 lbs/yd³ (90-355 kg/m³)</td>
</tr>
<tr>
<td>Water</td>
<td>*</td>
<td>*</td>
</tr>
<tr>
<td><strong>Air</strong></td>
<td>15 to 35%</td>
<td>5-15%</td>
</tr>
<tr>
<td><strong>28-Day Compressive Strength</strong></td>
<td>Maximum 100 psi (690kPa)</td>
<td>Minimum 125 psi (860 kPa)</td>
</tr>
<tr>
<td><strong>Unit Weight (Wet)</strong></td>
<td>90-100 lbs/ft³ (1440-1600 kg/m³)</td>
<td>100-125 lbs/ft³ (1600-2000 kg/m³)</td>
</tr>
</tbody>
</table>

*Mix designs shall produce a consistency that will result in a flowable self-leveling product at time of placement.

**The requirements for percent air, compressive strength, and unit weight are for laboratory designs only and are not intended for jobsite acceptance requirements.

600.3.04 Fabrication

Ensure flowable fill is manufactured at plants that qualify as approved sources according to the Standard Operating Procedure for Quality Assurance for Ready-Mix Concrete Plants in Georgia (SOP 10). Mix and deliver according to Subsection 500.2.01 of the Specifications or other methods approved by the Engineer. Revolution counter requirements are waived.

600.3.05 Construction

When using as backfill for pipe, where flotation or misalignment may occur, assure correct alignment of the pipe by using straps, soil anchors, or other approved means of restraint.

Protect flowable fill from freezing for 36 hours after placement.

600.3.06 Quality Acceptance
A. Jobsite Acceptance

Acceptance of flowable fill is based on documentation as outlined in Subsection 500.1.03 of the Specifications and a minimum temperature of flowable fill at the point of delivery of 50 °F (10 °C).

600.3.07 Contractor Warranty and Maintenance
General Provisions 101 through 150.

600.4 Measurement

Flowable fill will be measured for payment in cubic yards (meters) in-place and accepted when shown as a pay item in the Contract. When flowable fill is not shown as a pay item, include the cost of the work in the bid price for the appropriate item.
Section 600—Controlled Low Strength Flowable Fill

600.4.01 Limits
General Provisions 101 through 150.

600.5 Payment
When shown as a pay item in the Contract, flowable fill complete, inplace and accepted will be paid for Per cubic yard (meter)
Payment will be made under:

| Item No. 600 | Flowable fill | Per cubic yard (meter) |

600.5.01 Adjustments
General Provisions 101 through 150.
