1-4 EDG REVISION SUMMARY

Version 2.2 - Revision Date: **March 15, 2007**

Any subsequent revisions to this document shall be documented below.

Revisions

Date	Description
3/15/07	Modified menus to reflect Erosion control changes.
"	Updated function keys menu and added help documents.
"	Updated GDOT Standard Border cell to reflect changes in sections 50-56.
"	Updated GDOT plot drivers.
"	Added Erosion Control linestyles
"	Updated Utility Legend
9/15/06	Added combination utility linestyles to EDG sections "UTLP" & "UTLE".
"	Moved guy wire cell origin to end-point of cell.
"	Added "To Be Removed" (TBR) linestyles to proposed utility menus.
"	Added TBR linestyle for Traffic Control.
"	Added GPLOT videos to GDOT Root Menu.
"	Added GPLOT Help to GDOT Root Menu.
"	Added sheet legends to GDOT-GN-Sheets cell library.
"	Corrected GDOT Root Menu macro for Detailed Estimate sheets. [Problem Description] Did not attach the correct cell library.
"	Corrected R/W linestyle attributes in EDG "PROP" section. [Problem Description] Did not match the approved R/W Legend.
"	Added GPLOT Help to GDOT Root Menu.
"	Added sheet legends to GDOT-GN-Sheets cell library.
"	Corrected GDOT Root Menu macro for Detailed Estimate sheets. [Problem Description] Did not attach the correct cell library.
"	Corrected R/W linestyle attributes in EDG "PROP" section. [Problem Description] Did not match the approved R/W Legend.
3/15/06	**Linestyles** – modified and/or added various linestyles for Utilities, Erosion Control, Signing & marking, etc…
"	**Level assignments and menu functions**– modified menu level functions to correspond to EDG specifications.
"	**Cells** – updated and/or added various cells to existing libraries.

1-5 GENERAL INFORMATION

Term EDG

In places where EDG is mentioned in this document, unless otherwise stated, it represents an acronym for Electronic Data Guidelines and not the MicroStation EDG utility which is a graphics design file editor.

English Units

This document and the supporting CADD Standard files were written based upon Projects with English Units. Metric versions of these items will only be produced if the Department decides to start new projects in the Metric format.

Reference Files

The use of MicroStation reference files is required to prevent duplicate design information. Therefore, project design elements should exist in only one design file in most cases.

Topography

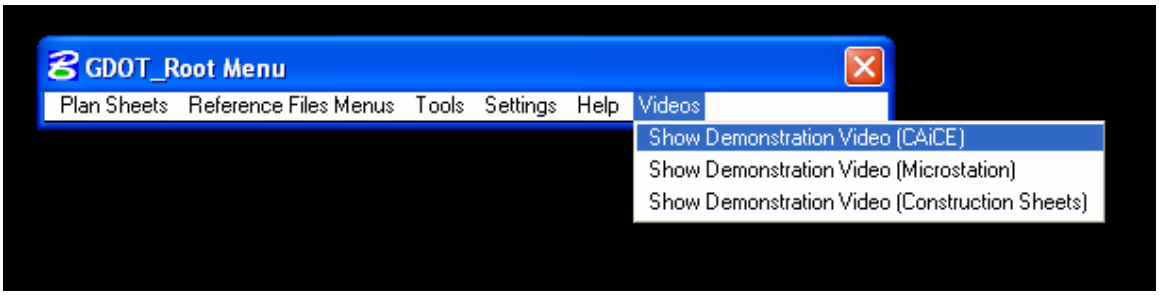
Only one topography file will exist for a project. Topography updates must be coordinated between the project manager and the SDE.

As a general rule, topography files will remain independent files and should not be modified. However, special situations may require manipulation of these files at the discretion of the project manager and may require coordination with the project SDE. Only topographic information should be included in topo files. No centerline information should be created or shown in the topography files.

GDOT Root Menu

The GDOT_Root Menu was developed to minimize common repetitive tasks of the plan sheet development process. This menu also aids with compliance to the current GDOT EDG by automating many of the steps needed for reference file and level settings. Further development of this menu is ongoing and we welcome your feedback and suggestions.

For help with using the GDOT_Root Menu, please see the videos which demonstrate the creation of the following files: MATCHLINE.dgn, SHEETLAYOUT.dgn, and a Construction and Utility plan sheet.



1-6 CURRENT DOT SOFTWARE VERSIONS

The current versions of major software used and accepted by the Georgia DOT are identified on the R.O.A.D.S. website:

http://www.dot.state.ga.us/dot/preconstruction/r-o-a-d-s/

All project deliverables must be submitted in CAiCE and Microstation software format. Technical support and documentation for CAiCE and Microstation versions other than the version identified on the R.O.A.D.S. website will not be provided by the Georgia DOT. The INI files, sheet commands, grid files, menus, workspaces, etc., provided by GDOT may not work for other versions.

MicroStation provides methods for exchanging select file types but data is often modified during the process. Improvements have been made and are being evaluated. If CADD software other than MicroStation J is used, those files should be converted to MicroStation J file format and thoroughly reviewed prior to transmitting to the department.

1-7 GUIDELINES FOR SUBMITTING ELECTRONIC DATA TO THE DEPARTMENT

All electronic data furnished to the GA DOT shall use the appropriate naming scheme and format for the type of data to be transmitted. It is very important to clearly communicate what is being transmitted and to describe the format of the transmitted files.

A letter is to be attached to **all submissions** stating briefly:

1. File content
2. File Format (zipped, XP, 2000, MicroStation, CAiCE etc. and the utility used)
3. CAiCE or MicroStation version (as identified on R.O.A.D.S. website)
4. Number of CDs .
5. Files must be in the proper format before transmitting to the DOT. No translating of information by DOT personnel shall be required.
6. If files are zipped or backed up, a brief explanation of the recommended procedure to extract the files should be included.
7. Versions of software must be current to or fully compatible with that of the GA DOT.
8. Each disk submitted shall be labeled and dated with a minimum of the PI# and date. If a series of disks are transmitted, the disk label shall also include the disk number and the total disks of that set, (ex: 1 of 10). Other subsequent disks shall be labeled so as to uniquely identify each group or set and shall include the sequence number followed by the total number in the group (ex: 2 of 10, 3 of 10, etc.)
9. The DOT reserves the right to reject any file transmitted that does not conform to these guidelines.

Deviation from Format

Any file to be submitted that deviates from the above mentioned format must have prior DOT approval. The approval must be in writing with the name of the individual from the DOT who permitted the varying format.

Using Backup, Disks, and Compression

In general, all files are to be furnished on one of the following in order of preference:

1) **CD's**
2) **FTP**

Winzip

If data compression is necessary, WINZIP will be the standard format used. The WINZIP executable shall be included with the transmitted files. If a file or a group of files is too large to be copied on a single diskette, then a zip disk or CD is recommended.

1-8 GRAPHIC STANDARDS

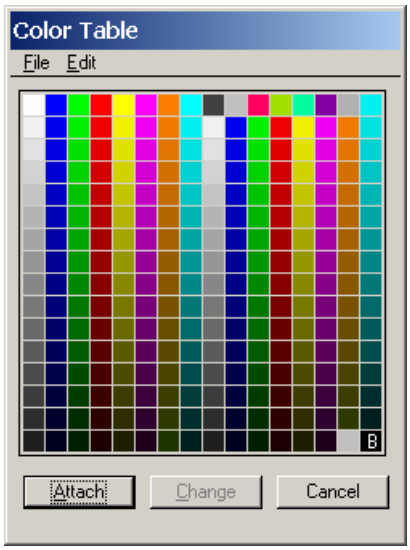
MicroStation

Color Tables:

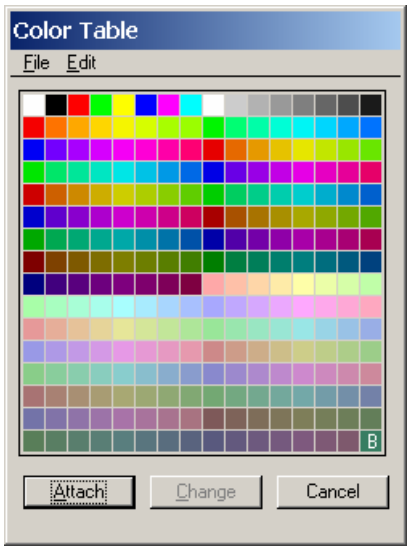
The Department has two acceptable Microstation color table formats:

GDOTcolor.tbl	for use in plan file production.
GDOTDcolor.tbl	for use in concept layouts (public displays).

GDOTcolor.TBL



GDOTDcolor.tbl



MicroStation

Line Code:

2	=	MEDIUM DASH
3	=	LONG DASH
4	=	DOT DASH
5	=	SHORT DASH
6	=	DASH DOT DOT
7	=	LONG DASH SHORT DASH

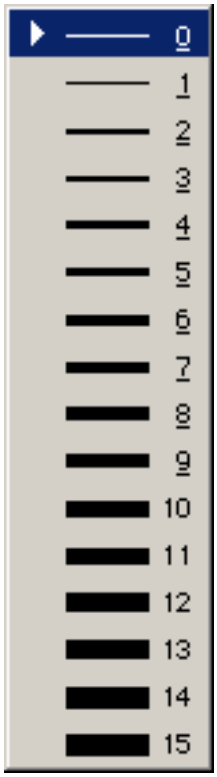
13 =	0.070"
14 =	0.075"
15 =	0.080"
10 =	0.085"



WEIGHT VS. THICKNESS

*** NOTE:** MicroStation weights range from 0 to 31. The resulting weight as shown above is not a MicroStation design file thickness value as viewed on the monitor screen, but is the measured width or thickness on a hardcopy plot from an output device such as a plotter. The resulting value may vary slightly in appearance or measured width due to plotter specific controls. A measured value of width or thickness as shown above is desired and must be obtained within a reasonable tolerance.

Experience indicates there is no problem meeting the above guideline for thickness and appearance. For that reason, a tolerance value is not specified. If upon review of plans submitted to the Department or submitted by another office of the Department, it is found that the line thickness, weight, or style does not meet the Departments guidelines, the Department shall reserve the right to reject those plans.

MicroStation

User Defined Line Styles:

The Department has created over 450 user defined line styles for use in displaying Utilities, Erosion Control Items, Guardrail, Fencing and many other linear displayed features. The only acceptable line styles that the Department will accept are those that the Department has provided. Any suggestions for future line styles should be submitted to the **Plan Presentation Committee.**

PPC@dot.state.ga.us

Microstation - File Format

From the MicroStation (IGDS) file type, the number of units of resolution are: 4,294,967,295 or 2 to the 32nd power +1.

The English Seed file is noted as GDOT2D.DGN and is different than the SEED2D.DGN provided with the MicroStation software. The original SEED2D.DGN file provided with MicroStation should not be used for creating files for the DOT.

English Units

FOR ALL ENGLISH MICROSTATION FILES
MicroStation J file format is to be used for all CADD files submitted using the following working units:

Master Units:	FT		
Sub Units:		th	
Resolution:		1000	th per FT
Positional Units:		1	(Positional Units per th)
Working area of		4,294,967	FT square

The GDOT2D.dgn seed file has been set with a Global Origin as follows:

GO=0,0
XY=-2147483647,-2147483647

This provides a design plane for a range in coordinate values (x,y) from (0,0) to (4,294,967.295,4,294,967.295).If coordinates are placed on or outside the design plane, a problem with the file will result.

1-9 MINIMUM TEXT SIZE FOR RIGHT OF WAY PLANS

English Text Size Guidelines

The minimum size for text on a set of English Right of Way plans and plans in general is to be 0.15 inches on the final D size plot.

Text information shown on Right of Way plan sheets should be placed at a minimum size of (0.15 X the scale for the plans). Plans are usually done at 1 inch equals fifty feet (1"=50') which would equal a text size of 7.5ft (0.15 x 50 = 7.5) or for 1 inch equals twenty feet (1”=20’) which would equal a text size of 3.0ft (0.15 x20 =3.0).

NOTE ON WEIGHT FOR TEXT

It is important on small text to keep the weight to a maximum of weight=2 and preferably either weight 0 or 1. Heavier weights, especially numbers, when reduced to a small document will appear as blurred objects and are not legible.

Why the minimum size and weight for text

A minimum text size on Right of Way plans must be followed for several reasons. The most important is the requirement for filing legible courthouse documents, deeds, etc. Plans, or selected areas of plans are often reduced to a letter size document to provide the legal description to be filed in the courthouse as the final document. The minimum text size guideline was established to meet the need of this requirement.

There are situations where the text size may be smaller but this generally applies to construction plans. The final output is also dependent on the device used for generating the final plot or hardcopy. The above guideline for text size considered these factors and more when selecting the size.

1-10 FILE CONVERSION -- Metric / English

When converting meters to feet and extreme accuracy is needed, use the conversion factor for U.S. Survey Feet rather than the slightly different factor for the International Foot. The factors are as follows:

U.S. Survey Feet (GA DOT plans)

For conversion of meters to U.S. Survey Feet, multiply the meters by 39.37 divided by 12 which is 3.28083333333 to 12 significant figures.

To further explain: using 1 meter = 39.37 inches, and converting to meters per feet,

((1 m / 39.37 ") x (12 " / ft)) = 0.3048006096012 m/ft or rounding for a factor of 0.3048

International Feet

For conversion of meters to International Feet, multiply the meters by 100.0 divided by 30.48 which is 3.28083989501 to 12 significant figures.

To further explain: using 25.4 millimeters = 1 inch, and converting to meters per feet,

((25.4 mm / 1 ") x (12 " / ft) x (m / 1000 mm)) = 0.3048000000000 m/ft or rounding for a factor of 0.3048

1-11 SAVING VIEWS IN MICROSTATION FOR PLOTTING

Problem: Recalling information to plot

When design files are provided for review, modification, revision, etc., the personnel viewing or modifying the design files cannot easily determine which reference files were attached or what levels were displayed in producing the final hardcopy plot.

Solution: Super Saved Views

For each sheet file and all major files for which a plot is created from, a Super Saved View called **GPLOT** should be created that contains the exact levels displayed for the active file and all reference files attached which produce the final plot.

Once the file is rotated on the screen correctly, view attributes set correctly, all files attached with appropriate levels displayed and all reference files clipped, the user can either use the **GDOT_Root Menu** command, ***Save Super View GPLOT*** or key-in **MACRO SV GPLOT** to save the view. This will create a file with the prefix the same as the design file plus the following extension **_GPLOT**.svb.

Example 123456CP01_**GPLOT**.svb

These .svb files should be included in any submission of project plans to department personnel.

For example, assuming the design file 123456CP01.DGN for mainline will be opened in MicroStation for review or modification and the plotting information was saved in a Super Saved View named GPLOT, the reviewer would open the design sheet file in MicroStation by either accessing the **GDOT_Root Menu** and selecting ***Recall Super View GPLOT*** or by the key-in **MACRO VI GPLOT**. This should display the file exactly as it appeared when the Super Saved View of **GPLOT** was created.

The two macros SV and VI are provided with the Georgia DOT Microstation download.

1-12 FILE LOCATIONS

USING PI # FOR SUBDIRECTORY

The P.I.# less the first character followed by four characters shall be used to describe the type of MicroStation design file.

Assuming the drive letter C:\ is used as the root directory and a PI Number of 0001234 is the active project, the first number of the PI number, 0 for this project, should be dropped and the appropriate file type added. The resulting file prefix would now be the **6 digit number** 001234 plus the 4 character description.

Example: 001234MAIN.dgn for the main design file.
This naming convention allows many of the processes in attaching reference files to be automated. The **6 digit number prefix** must be used in order for these automation tools to function properly.

All design file names must use the 6 digit PI Number as part of the file name with the exception of the **Sheetlayout.dgn** and the **Matchline.dgn** files.

All MicroStation files should be located in a subdirectory of the PI Number named \DGN\.

Example: C:\001234\DGN

Note: Microstation reference files should be attached without the Save Full path option on. By following the conventions set forth in the file names and their locations, the project will work whether or not a drive letter changes due to the transfer of files.

CAiCE Archive files should be stored in a subdirectory of the PI Number named \CAiCE\.

Example: C:\123456\CAiCE

1-13 MISCELLANEOUS ITEMS

A clipped boundary should be placed so that a match line is created for the adjacent sheets to be plotted. This minimizes the possibility for duplication of data between plan sheets.

It is recommended to display levels on a final plot as illustrated later in these guidelines. This will help ensure consistency as well as assist in the automation of procedures. As with any document there may be items that have not been addressed and the project designer will need to make the final determination of level display for each sheet. Documentation must be provided for information placed in Microstation files that are not listed in Sections 2-4 and 2-6.

Documentation of procedures and project history should be maintained in a project log file.

2-4 Plan Assembly Sheet Sections

The following sections describe in a spreadsheet format the Design File Name and Level Schemes that should be used on Georgia DOT plan sheets.

(1)Cover

Design File Name(s)	Reference File Name	Logical Name	Levels On
123456CV01.DGN	NA	NA	1,43-56,60-62
	123456**MAIN**.DGN	MAIN	1-4,6,11,15
	123456**DRNG**.DGN	DRNG	15
	123456**REQD**.DGN	REQD	(See PPG Notes)
	123456**PROP**.DGN	PROP	34
	123456**TOPO**.DGN	TOPO	1,11,13,21,23,
	123456**ENVE**.DGN	ENVE	1,3,6,9,11,13,15,17,20,22,25,27,30,32,40,42

(2)Index

Design File Name(s)	Reference File Name	Logical Name	Levels On
123456IN01.DGN	NA	NA	2,45-49,60-62
The files listed below should reside in each PI Project Number folder with the following naming conventions:			
Index.txt			
Index_standards.txt			
Index_details.txt			
These files should be edited for each specific Project with Wordpad or other editor that retains the formatting for columns.			
This will allow for easier placement of the .txt file on Level 2 into the design file with the Automation Tools provided.			

(3)Revision Summary

Design File Name(s)	Reference File Name	Logical Name	Levels On
123456RV01.DGN	NA	NA	3,45-49,60-62
The file listed below should reside in each PI Project Number folder with the following naming convention:			
revison_summary.txt			
This file should be edited for each specific Project with Wordpad or other editor that retains the formatting for columns.			
This will allow for easier placement of the .txt file on Level 3 into the design file with the Automation Tools provided.			

(4)General Notes

Design File Name(s)	Reference File Name	Logical Name	Levels On
123456GN01.DGN	NA	NA	4,45-49,60-62
See GDOT-GN-General-Notes.cel library for general notes.			
General Notes should be placed on Level 4.			

(5)Typical Sections

Design File Name(s)	Reference File Name	Logical Name	Levels On
123456TY01.DGN	NA	NA	5,45-49,60-62
	123456**TYPS**.DGN	TYPS	1-61
See GDOT-GN-Typical Sections.cel library for Typical Sections.cells.			

(6)Summary Quantities

Design File Name(s)	Reference File Name	Logical Name	Levels On
123456QN01.DGN	NA	NA	6,45-49,60-62

(7)Quantities Amendment

Design File Name(s)	Reference File Name	Logical Name	Levels On
123456QA01.DGN	NA	NA	7,45-49,60-62

(8)Quantities (Construction)

Design File Name(s)	Reference File Name	Logical Name	Levels On
123456QC01.DGN	NA	NA	8,45-49,60-62

(9)Detailed Estimate

Design File Name(s)	Reference File Name	Logical Name	Levels On	
123456DT01.DGN	NA	NA	9,45-49,60-62	
The file listed below should reside in each PI Project Number folder with the following naming convention:				
Detailed_estimate.txt				
The output file from the Web Version of the Detailed Estimate program is used in the production of this design file..				
This will allow for easier placement of the .txt file on Level 9 into the design file with the Automation Tools provided.				
This will produce multiple sheets in the design file that should be copied in order to only have one sheet design file per respective sheet..

WALL

MicroStation level (63 levels per design file)	MicroStation Level Names	Description	CAiCE Feature Code	Microstation Line Style or Cell	Color	Weight
RETAINING WALL, PROPOSED						
20		Proposed retaining wall **lines**		**0**	**7**	**2**
21		Proposed retaining wall **description & labels**		**0**	**7**	**2**
22		Proposed footing **lines**		**2**	**4**	**1**
MEDIAN OR SIDE BARRIER, PROPOSED						
30		Proposed median or side barrier wall **lines**		**0**	**7**	**2**
31		Proposed median or side barrier **description & labels**		**0**	**7**	**2**
32		Proposed foundation **lines**		**2**	**4**	**1**
SOUND BARRIER WALL, PROPOSED						
40		Proposed sound barrier wall **lines**		**0**	**7**	**2**
41		Proposed sound barrier wall **description**		**0**	**7**	**2**
42		Proposed foundation **lines**		**2**	**4**	**1**
63		Miscellaneous notes for designer (not used in plans)				

MicroStation level (63 levels per design file)	MicroStation Level Names	Description	CAiCE Feature Code	Microstation Line Style or Cell	Color	Weight
RETAINING WALL PROFILES						
20		Grid **Stations & Elevations**		**0**	**7**	**2**
21		Proposed **incremental elevations**		**0**	**7**	**2**
32		Proposed Retaining Wall envelope **lines**		**0**		**2**
33		Proposed Retaining Wall **description & labels**		**0**		**2**
34		Proposed Median or Side Barrier Wall envelope **lines**		**0**		**2**
35		Proposed Median or Side Barrier Wall **description & labels**		**0**		**2**
36		Proposed Sound Barrier Wall Envelope **lines**		**0**		**2**
37		Proposed Sound Barrier Wall **description & labels**		**0**		**2**
40		**Existing Ground**		**2**	**2**	**1**
41		**Finished Ground** (face of wall)		**0**		**1**
42		**Finished Ground** (back of wall)		**6**		**1**
63		Miscellaneous notes for designer (not used in plans)				

MicroStation level (63 levels per design file)	MicroStation Level Names	Description	CAiCE Feature Code	Microstation Line Style or Cell	Color	Weight
CONSTRUCTION CENTERLINE						
1		Construction centerline - **lines**	**CONSTCL**	**0**	**6**	**4**
2		Construction centerline - **tic marks and sta labels**	**CONSTCL**	**0**	**6**	**4**
3		Construction centerline - **PC/PT station labels w/flags**	**CONSTCL**	**0**	**6**	**3**
4		Construction centerline - **bearings**	**CONSTCL**	**0**	**6**	**3**
5		Construction centerline - **curve label & data table**	**CONSTCL**	**0**	**6**	**3**
SIDE OR CROSS ROAD CENTERLINE						
6		Side or Cross road centerline - **lines**	**SIDECL**	**0**	**6**	**4**
7		Side or Cross road centerline - **tic marks and sta labels**	**SIDECL**	**0**	**6**	**4**
8		Side or Cross road centerline - **PC/PT stattion labels w/flags**	**SIDECL**	**0**	**6**	**3**
9		Side or Cross road centerline - **bearings**	**SIDECL**	**0**	**6**	**3**
10		Side or Cross road centerline - **curve label & data table**	**SIDECL**	**0**	**6**	**3**
PROPOSED ROADWAY EDGE OF PAVING						
11		Proposed roadway edge of paving - **lines**		**0**	**2**	**2**
12		Proposed roadway edge of paving - **description**		**0**	**2**	**2**
PROPOSED EDGE OF SHOULDERS						
13		Proposed edge of paved shoulder - **lines**	**EPSHLDR**	**0**	**4**	**2**
14		Proposed edge of paved shoulder - **description**	**SHLDR**	**0**	**5**	**2**
APPROACH SLABS						
11		Approach slab - **lines**		**0**	**4**	**2**
12		Approach slab - **description**		**0**	**5**	**2**

MicroStation level (63 levels per design file)	MicroStation Level Names	Description	CAiCE Feature Code	Microstation Line Style or Cell	Color	Weight
BRIDGE PLANIMETRICS						
15		Proposed bridge - **lines**			**0**	**4**
16		Proposed bridge - **description**			**4**	**2**
DRIVEWAYS						
17		Driveway - **lines**		**0**	**5**	**2**
18		Driveway - **description**		**0**	**4**	**2**
CURB & GUTTER						
19		Proposed curb & gutter - **lines - gutter line & back of curb**		**0**	**2**	**1**
20		Proposed curb & gutter - **description**		**0**	**4**	**2**
SIDEWALK FACE AND BACK						
21		Sidewalk - **lines**		**0**	**4**	**1**
22		Sidewalk - **description**		**0**	**5**	**1**
GUARD RAIL, PROPOSED						
23		Proposed guard rail - **lines and anchor**		**0**	**7**	**2**
24		Proposed guard rail - **description**		**0**	**5**	**2**
MEDIAN OR SIDE BARRIER, PROPOSED						
25		Proposed median or side barrier **- lines**		**0**	**4**	**2**
26		Proposed median or side barrier - **description**		**0**	**5**	**2**
RETAINING WALL, PROPOSED						
27		Proposed retaining wall - **lines**		**0**	**4**	**2**
28		Proposed retaining wall - **description**		**0**	**5**	**2**

MicroStation level (63 levels per design file)	MicroStation Level Names	Description	CAiCE Feature Code	Microstation Line Style or Cell	Color	Weight
SOUND BARRIER WALL, PROPOSED						
29		Proposed sound barrier wall - **lines**		**0**	**4**	**2**
30		Proposed sound barrier wall - **description**		**0**	**5**	**2**
FENCE, PROPOSED						
31		Proposed fence - **lines**		**0**	**3**	**2**
32		Proposed fence - **description**		**0**	**3**	**2**
CONSTRUCTION FEATURE, MISC., PROPOSED						
33		Proposed misc. construction feature - **lines**		**0**	**5**	**2**
34		Proposed misc. construction feature - **description**		**0**	**4**	**2**
CROWN POINT						
35		Proposed crown point	**CROWN**	**0**	**3**	**1**
ROADWAY DETAILS						
36		Begin/end project & centerline intersection labels		**0**	**4**	**2**
37		Begin/end construction and limit of construction labels			**4**	**2**
38		Route # / road names and centerline label (CL Cell)		**0**	**4**	**2**
39		Roadway dimensions		**0**	**4**	**2**
40		Superelevation transition labels		**0**	**4**	**2**
41		Miscellaneous detail information			**4**	**2**
DESIGN GUIDES						
50		Lane lines (intersection and transition layout guides)		**0**	**3**	**1**
51		Shouder hinge point chain		**0**	**3**	**1**
63		Miscellaneous notes for designer (not used in plans)
