Site Classification: We recommend a site class of E in accordance with AASHTO LRFD 7th Edition Section 3.10.3.1.

Loads: Please provide the Maximum Factored Strength Limit, Service Limit, and Extreme Event Limit Loads for the above foundation types. Provide the loads per column for drilled shafts, per pile for pile bents/footings, and as a bearing pressure for spread footings. When recommending pile footings, please provide the approximate bottom of footing elevation for the proposed bents. These loads and elevations are required to complete the Bridge Foundation Investigation Report.

Included with the foundation recommendation is 1 boring layout and 4 preliminary boring logs.

If additional information is needed, please contact Nicolas Sotolongo of the Geotechnical Bureau at (404) 608-4729.
