

Office of Materials and Testing  
Qualified Products List

<p>The following is a list of coarse aggregate sources established according to the specifications set forth in Standard Operating Procedure No. 1, "Monitoring the Quality of Coarse and Fine Aggregates." These sources have proven their capability of meeting the requirements of 800.2.01 of the Standard Specifications. All of these sources are approved to certify materials for use in Portland cement concrete and/or asphaltic concrete. Most of these sources also supply a full range of other products.</p>	<p><b>QPL-2</b></p> <p>Coarse Aggregate Sources</p> <p><b>Section A "Standard Sources List"</b></p>	<p><b>Pit and Quarry Control Branch</b>  <b>15 Kennedy Drive</b>  <b>Forest Park, GA 30297</b></p> <p><b>Office Phone: 404-608-4845</b>  <b>Office Fax: 404-608-4752</b></p>
--	---	--

The sources listed have approved Quality Control Programs and materials they certify may be used prior to project testing unless non-uniform or non-specification material is suspected. Section 106 of the Standard Specifications provides that the approval of preliminary samples does not obligate the engineer to accept the materials from the same source delivered later.

For the purpose of this list, the descriptions listed under CHARACTER OF MATERIAL are very general.

Producer/Location of Source	Source Number	General Character of Material	GDOT 319 Code	Aggregate Group	Specific Gravities			GAB Theoretical Density lb/ft <sup>3</sup> @ Opt. Moist.	Percent Absorption	L.A. Abrasion Loss %	Class	Magnesium Sulfate Soundness Loss %	Remarks

Villa Rica, GA 25 Old Rock Quarry RD Villa Rica, GA 30180 770-459-5134	089C	Granite Gneiss	2	II	2.666	2.649	2.676	135.9/5.3	0.62	31	A	0.4	

NOTE 1: Contains excessive sulfur computed as sulfide sulfur. Not to be used in bridge-type structures.  
 NOTE 2: Testing has shown this aggregate to be potentially alkali-silica reactive. Certain restrictions apply to its use in Portland cement concrete and these restrictions must be verified by the Office of Materials and Testing prior to use.  
 NOTE 3: Mechanically graded rip rap can be furnished from this source.  
 NOTE 4: The restrictions applicable to the use of Group I aggregate in bituminous mixes do not apply to this Group I aggregate. All other Group I specifications are applicable.  
 NOTE 5: Material at times may exceed abrasion loss limits of Class A. Verification of class will be made when Class A material is required.  
 NOTE 6: This material is not approved for use in Portland cement concrete construction.  
 NOTE 7: Use of this material for asphaltic concrete construction on Interstate Projects or for Portland Cement Concrete construction must be approved by the Office of Materials and Testing.  
 NOTE 8: Portland Concrete Design Restrictions (Current restrictions and exemptions should be verified through the Concrete Branch of the Office of Materials and Testing)  
 a. Restricted from use in Class AA-1 Portland cement concrete.  
 b. Restricted from use in Class AA and AA-1 Portland cement concrete.  
 c. Restricted from use in Class A, AA, and AA-1 Portland cement concrete.  
 d. Restricted from other uses as determined by the Concrete Branch.

Office of Materials and Testing  
Qualified Products List

<p>The following is a list of coarse aggregate sources established according to the specifications set forth in Standard Operating Procedure No. 1, "Monitoring the Quality of Coarse and Fine Aggregates." These sources have proven their capability of meeting the requirements of 800.2.01 of the Standard Specifications. All of these sources are approved to certify materials for use in Portland cement concrete and/or asphaltic concrete. Most of these sources also supply a full range of other products.</p>	<p><b>QPL-2</b>  Coarse Aggregate Sources  <b>Section B "Temporary Sources List"</b></p>	<p><b>Pit and Quarry Control Branch</b> <b>15 Kennedy Drive</b> <b>Forest Park, GA 30297</b>  <b>Office Phone: 404-608-4845</b> <b>Office Fax: 404-608-4752</b></p>
--	--	---

These listed sources have approved Quality Control Programs that are applicable to the products listed. The listed products may be certified by the producer and may be used prior to project control tests unless non-uniform or non-specifications material is suspected. Section 106 of the Standard Specifications provides that the approval of preliminary samples does not obligate the Engineer to accept materials from the same source delivered later.

For the purpose of this list, the descriptions listed under CHARACTER OF MATERIAL are very general.

Producer/Location of Source	Source Number	Character of Material	Aggregate Group	Class	GAB Theoretical Density lb/ft <sup>3</sup> @ Opt. Moist.	Approved Products
<p><b>Alabama Sand &amp; Gravel, Inc.</b> <b>Billingsely, AL</b> 2454 County RD 67 Billingsely, AL 36006 334-412-2967</p>	129T	Alluvial Gravel		A		No. 78 stone for precast concrete (Note: Aggregate potentially is alkali-silica reactive. Use requires 25% cement replacement with Class F fly ash unless otherwise approved by the Office of Materials and Testing.)
<p><b>Blue Water Industries</b> <b>Lenoir City, TN</b> 2107 Big Hill Road Lenoir City, TN 37772</p>	184T	Dolomitic Limestone	I	A		Coarse aggregate for Precast Concrete
