Warren and McDuffie County...

I-20 eastbound shoulder maintenance work closing lane

What: Georgia Department of Transportation (GDOT) maintenance crews today began scheduled Interstate 20 eastbound inside shoulder clipping work within Warren and McDuffie counties. Due to the activity in the median, the inside travel lane will be closed during working hours.

Shoulder clipping and slope repair maintenance eliminates soil and grass buildup along the roadway to allow proper drainage. The traveling public should pay close attention to personnel and heavy equipment moving along the edge of I-20 at various times.

The Department is committed to providing the highest level of safety for both motorists and workers. Motorists should understand that four-out-of-five victims in work zone crashes are actually drivers and passengers. GDOT has lost 58 employees in the last four decades due to work zone incidents. The Department asks all drivers to pay attention, slow down and watch for workers.

When: Monday, May 9 through Thursday, May 12 from 8 a.m. to 4 p.m. as weather allows

Where: GDOT will have crews along the inside lane of I-20 eastbound between miles 160 to 177 affecting Warren and McDuffie County at various times.
