Georgia DOT Begins Mowing Activities in Fannin

WHAT A Georgia DOT’s maintenance crew is set to work this week on mowing the roadsides of State Route (SR) 60 Spur in Fannin County. Work will proceed daily between the hours of 7:30 a.m. and 5:30 p.m., weather permitting.

The Georgia DOT maintains more than 750,000 acres of highway right-of-way. That amounts to a lot of grass to mow, brush and weeds to control, and land to maintain. Some of this roadside land is located in the medians of divided highways and the interiors of interchanges. GDOT has developed a responsive roadside management program that benefits many. Some of the major benefits of this program include fewer accidents by GDOT mowers on dangerous slopes; reduced mowing saves money for tax payers and GDOT; pleasing roadside appearance; less erosion of roadsides; and restricts growth of unwanted vegetation. GDOT spends approximately \$44 million annually on mowing and litter pickup. It is done for safety, vegetation control, improved drainage, and aesthetic reasons.

WHEN: Tuesday, June 14 through Friday, June 17, 2016 from 7:30 a.m. until 5:30 p.m.
