*Tift County...*

### **Possibility of Water over the Road Closes a Section of I75 North**

**What:** The Georgia Department of Transportation has closed a portion of the inside (left) lane of Interstate 75 North in Tift County due to the possibility of water accumulating on the roadway during heavy rain. A major resurfacing project is under way on I-75. The lane will remain closed until the weather allows the contractor to pave the final riding surface, which is more porous asphalt. The top layer is designed to reduce tire noise, provide a smoother riding surface and facilitate drainage.

**Where:** Interstate 75 North inside lane between Exit 59/Southwell Boulevard and Exit 61/Omega Road, Tifton.
