Morgan and Oconee Counties...

Resurfacing, Restriping on SR 24/US441 to Begin Soon

Georgia DOT has awarded a maintenance project to address the deteriorating infrastructure occurring on State Route 24/US 441. The project will consist of milling, resurfacing and restriping from the Morgan County line to just north of Thomas Farm Road.

The project has been awarded to Pittman Construction Company of Conyers, Ga. for approximately \$2.5 million. The expected resurfacing project timeframe is 12 months, weather permitting, once notice to proceed is provided to the contractors. The typical paving season is from March through November.

Please be aware that this maintenance project is a separate effort from PI#s 0013613 (Bishop Bypass) and 0013617 that include the corridor from the Madison Bypass to the Watkinsville Bypass (Morgan and Oconee Counties) that are determining what improvements are needed on SR 24/US 441 in the same area. These projects are just beginning the concept development phase and are not scheduled to be let to construction until sometime around 2021.

“There is great importance for us to maintain our roads and bridges and advance safety projects throughout the state,” said District Engineer Brent Cook. “This project is an example of our commitment to improving deteriorating infrastructure in a timely fashion to ensure the safety of the traveling public and to provide efficient mobility for continued growth.”

Stay tuned for updated information on the status and construction schedule as that information becomes available. If you have questions regarding the US 441 Improvements, email US441Improvements@dot.ga.gov.

The Georgia Department of Transportation is committed to providing a safe, seamless and sustainable transportation system that supports Georgia’s economy and is sensitive to both its citizens and its environment.
