Shady Dale railroad crossing work requires detour

WHAT: Railroad crossing concrete panel installation in Shady Dale requires a traffic detour next week.

WHEN: Weather permitting, the panel work will start Tuesday, August 2 and end Friday, August 5.

WHERE: Shady Dale railroad crossing on state Route (SR) 142 at mile post 3.52; The official detour utilizes SR 83, SR 11 and SR 16. Local traffic will still have access.

WHY: Railroad companies routinely upgrade their crossings which provides a more stable and safer surface for crossing vehicles. Georgia DOT coordinates with the railroad entities to setup the detour and approve the work on our state route system.
