Georgia DOT Reminds Residents And Businesses In Northwest Georgia To Turn Off Sprinklers

CARTERSVILLE, Ga. -- As winter arrives and temperatures begin to dip below freezing, the Georgia Department of Transportation reminds the residents of Northwest Georgia to turn off sprinkler systems with automatic timers set to run overnight.

“Sprinkler systems that are left on overnight in freezing temperatures can create a hazardous condition for motorists the next morning,” said Dewayne Comer, district engineer at the DOT office in Cartersville. “Every year we see accidents caused by icy spots formed when water from sprinkler systems gets onto the roadway. Spray from the sprinkler is blown onto the road or water drains onto the road; black ice is formed and ice develops creating a hazard for motorists. Please take a moment and ensure your automatic sprinkler system is turned off. Anytime we have sub-freezing temperatures, please be on the lookout for icy patches or black ice, especially early in the morning,” Comer urged area residents.

The Georgia DOT urges businesses and residents to ensure that automatic sprinkler systems are properly turned off. Drivers are cautioned to be on the lookout for icy patches or black ice, especially as sub-freezing temperatures approach.

The Georgia Department of Transportation is committed to providing a safe, seamless and sustainable transportation system that supports Georgia’s economy and is sensitive to both its citizens and its environment.
