Walton Branch Bridge Detour Removed on SR 232

What: On behalf of Gregory Bridge Company, the Georgia Department of Transportation announces that the State Route 232 (Columbia Road) detour at the Walton Branch bridge has been removed. Traffic will shift back to the mainline today. During this transition, please expect brief delays due to single lane closures while the contractor finalizes the shift. The single lane closure is only in effect for today. Drive safely and be patient in all work zones.

This project deals with the replacement of the existing 69-foot-by-26-foot concrete bridge and construction of a new 180-foot-by-36-foot reinforced bridge at the same location. The old Walton Branch bridge was built in 1948 and reconstructed in 1975.

When: Detour removal effective Tuesday, March 31 as traffic shifts onto the new bridge; Single lane closure expected for Tuesday only.

Where: Walton Branch on SR 232/Columbia Road four miles northeast of Grovetown
