

# SR 316 at SR 211 and SR 316 at Barber Creek Road Reconstruction Projects – Bundle 1

P.I. Numbers: 0010352 and 0013910 – Design-Build Office of Alternative Delivery (OAD) Projects

Fact Sheet

## Where are the Projects?

## What are the Projects?

The State Route (SR) 316 Reconstruction Projects will upgrade sections of SR 316 to more of a free-flow facility to promote safety.

Two interchange construction projects, part of the larger SR 316 Reconstruction Projects, will be bundled into one construction package. This bundle will:

- Upgrade the existing at-grade intersections at SR 316 and Bethlehem Road and Barber Creek Road to grade-separated interchanges.
- Add a cul-de-sac at the existing at-grade crossings at SR 316 and McCarty Road and Craft Road.
- Provide access from McCarty Road to Bethlehem Road via a new frontage road.
- Provide access from Craft Road north of SR 316 to Barber Creek Road via a new frontage road.
- Extend Statham Drive west to merge into Price Street.

## 5 Things You Need to Know

1. These improvements make up a series of projects that will transform SR 316 into more of a free-flow facility.
2. To accelerate the procurement and construction schedule, these projects have been bundled and will be awarded under one contract to one Design-Build team.
3. There are 13 proposed projects on the SR 316 corridor within Barrow County.
4. This portion of SR 316 in Barrow County serves approximately 27,200 vehicles per day, 9% being truck traffic.
5. Eliminating at-grade intersections would reduce the number of vehicle conflict points and potential incidents at the intersections.

## What's the Status?

Georgia DOT is seeking public comments on the projects from April 6, 2022, to May 2, 2022. The project bundle is expected to be awarded to a Design-Build team in Q2 2023.
