## Tips for Safer Bicycling

**Obey Traffic Laws.** Bicyclists must know and obey all traffic laws, signs, signals, and pavement markings.

**Wear a Bicycle Helmet.** Georgia law requires those under the age of 16 operating a bicycle or riding as a passenger to wear a certified and properly attached helmet. A well-fitting, properly worn, certified helmet could save your brain and your life.

**Always Ride With The Flow Of Traffic.** Riding against traffic significantly increases the opportunity for and severity of crashes. Motorists, other bicyclists, and pedestrians are not looking for anyone bicycling in the wrong direction on the wrong side of the roadway.

**Pass Only On The Left.** Only pass on the right judiciously. Other road users are not typically looking for anyone passing on the right. Passing on the right increases the likelihood of crashes.

**Be Predictable.** Use hand signals to indicate your intentions to turn, change lanes, merge, slow, and/or stop. Your position within the roadway and in a lane will also, indirectly, signal your intentions. Avoid sudden unexpected movements. Do not weave in and out of traffic. Pick and hold a steady line.
