

## GEORGIA DEPARTMENT OF TRANSPORTATION

## **ELECTRONIC DATA GUIDELINES**

Version 2.1

**Current Revision Date: September 15, 2006** 

### 1-2 TABLE OF CONTENTS

### **Electronic Data Guidelines (Section 1)**

- 1-1 Electronic Data Guidelines Cover
- 1-2 Table of Contents
- 1-3 Disclaimer
- 1-4 EDG Revision Summary
- 1-5 General Information
- 1-6 Current DOT Software Versions
- 1-7 Guidelines for Submitting Electronic Data
- 1-8 Graphic Standards
- 1-9 Minimum Text for Right of Way
- 1-10 File Conversion-Metric/English
- 1-11 Saving Plotted Views
- 1-12 File Locations
- 1-13 Miscellaneous Items

### **Design File Names and Level Schemes (Section 2)**

- 2-1 Design File Names and Level Schemes Cover
- 2-2 Construction Plan Assembly
- 2-3 Plan Sheet Levels
- 2-4 Construction Plan Assembly Sheets Sections
  - (1) Cover
  - (2) Index
  - (3) Revision Summary
  - (4) General Notes
  - (5) Typical Sections
  - (6) Summary Quantities
  - (7) Quantities Amendment
  - (8) Quantities (Construction)
  - (9) Detailed Estimate
  - (10) Traffic Diagram
  - (11) Construction Layout
  - (12) Misc. Maps
  - (13) Mainline Plan
  - (14) Crossroad Plan
  - (15) Mainline Profile
  - (16) Crossroad Profile

#### 2-4 Construction Plan Assembly Sheets Sections (continued)

- (17) Driveway Profiles
- (18) Special Grading
- (19) Staging Plan
- (19) Staging Profiles
- (19) Staging Cross Sections
- (20) Staging Details
- (21) Drainage Area Map
- (22) Drainage Profiles
- (22) Drainage Cross Sections
- (23) Cross Sections
- (24) Utility Plans
- (25) Lighting Plans
- (26) Signing and Marking Plans
- (27) Signal Plans
- (28) ATMS Plans
- (29) Landscaping Plans
- (30) Mitigation Plans
- (31) Retaining Wall Envelope
- (32) Retaining Wall Plans
- (33) Sound Barrier Envelopes
- (34) Sound Barrier Plans
- (35) Bridge Plans
- (36) Culvert Plans
- (37) Miscellaneous Structures
- (38) Special Construction Detail
- (39) Special Culverts
- (40) Construction Details
- (41) Georgia Standards
- (50) Erosion Cover
- (51) BMP General Notes
- (52) ERC Drainage Area Map
- (53) BMP Location Details
- (54) CMP General Notes
- (55) Watershed Map CMP Plan
- (56) Erosion Construction Detail

### 1-3 DISCLAIMER

The guidelines contained in this document are for reference only. The material contained is provided without warranty or liability of any kind to the Department. Every effort has been made to make the documentation as complete and accurate as possible without errors.

This information is provided on an "as is" basis. Updates to these guidelines will be made as needed due to any errors found in the documentation, new programs, changes in software, software enhancements, or as policy and management dictate.

As with any documentation or guidelines, improvements can and should be made. Any additions, suggestions or comments for improvement are encouraged. This documentation is not meant to be a complete instructional document. The intent is to provide guidelines that, if followed, will result in better quality and consistency for electronic plans and documents.

Any recommendation for improvement to this documentation is welcomed. Any errors found should be brought to the attention of the DOT so corrections can be made. Any additional information or detailed explanation needed to this documentation should be documented and mailed to:

Director of Preconstruction
Georgia Department of Transportation

## 1-4 EDG REVISION SUMMARY

Version 2.1 - Revision Date: September 15, 2006

Any subsequent revisions to this document shall be documented below.

## Revisions

| Date    | Description   |
|---------|---|
| 3/15/06 | Linestyles – modified and/or added various linestyles for Utilities,        |
|         | Erosion Control, Signing & marking, etc                                     |
| 66      | Level assignments and menu functions— modified menu level                   |
|         | functions to correspond to EDG specifications.                              |
| cc .    | Cells – updated and/or added various cells to existing libraries.           |
| "       | <b>Menus</b> – added menu functions for several "Future Development" items. |
| 9/15/06 | Added combination utility linestyles to EDG sections "UTLP" & "UTLE".       |
| "       | Moved guy wire cell origin to end-point of cell.                            |
| "       | Added "To Be Removed" (TBR) linestyles to proposed utility menus.           |
| "       | Added TBR linestyle for Traffic Control.                                    |
| "       | Added GPLOT videos to GDOT Root Menu.                                       |
| "       | Added GPLOT Help to GDOT Root Menu.   |
| "       | Added sheet legends to GDOT-GN-Sheets cell library.                         |
| "       | Corrected GDOT Root Menu macro for Detailed Estimate sheets.                |
|         | [Problem Description] Did not attach the correct cell library.              |
| "       | Corrected R/W linestyle attributes in EDG "PROP" section.                   |
|         | [Problem Description] Did not match the approved R/W Legend.                |
|         |   |
|         |   |
|         |   |
|         |   |
|         |   |
|         |   |
|         |   |

### Menu and Source Files Revised/Added

| File Modified          | Description                        | File Location      | Status  |
|------------------------|------------------------------------|--------------------|---------|
|                        |                                    |                    |         |
| GDOTLSTY.rsc           | GDOT Linestyle Resource File       | GDOT\GDOTRoad\Symb | Revised |
| GDOT_ROOT.mdf          | GDOT Root Menu File                | GDOT\GDOTRoad\Data | Revised |
| REF_SIGN.mdf           | Sign Menu                          | GDOT\GDOTRoad\Data | Revised |
| REF_ENVP.mdf           | Proposed Environmental Menu        | GDOT\GDOTRoad\Data | Revised |
| REF_ENVE.mdf           | Existing Environmental Menu        | GDOT\GDOTRoad\Data | Revised |
| REF_50SCALE_PRUTIL.mdf | Proposed Utilities Menu – 50 Scale | GDOT\GDOTRoad\Data | Revised |
| REF_50SCALE_EXUTIL.mdf | Existing Utilities Menu – 50 Scale | GDOT\GDOTRoad\Data | Revised |
| REF_20SCALE_PRUTIL.mdf | Proposed Utilities Menu – 20 Scale | GDOT\GDOTRoad\Data | Revised |
| REF_20SCALE_EXUTIL.mdf | Existing Utilities Menu – 20 Scale | GDOT\GDOTRoad\Data | Revised |
|                        |                                    |                    |         |

Cell Library Files Revised/Added

| File Modified               | Description               | File Location       | Status _ |
|-----------------------------|---------------------------|---------------------|----------|
|                             |                           |                     |          |
| GDOT-UT-Utility.cel         | GDOT Utility Cell Library | GDOT\GDOTRoad\Cells | Revised  |
| GDOT-GN-Sheets.cel          | GDOT Sheets Cell Library  | GDOT\GDOTRoad\Cells | Revised  |
| GDOT-UT-UTILITY20.csf       | GDOT Cell Selector File   | GDOT\GDOTRoad\Cells | Revised  |
| GDOT-UT-EXIST-UTILITY50.csf | GDOT Cell Selector File   | GDOT\GDOTRoad\Cells | Revised  |
| GDOT-UT-EXIST-UTILITY20.csf | GDOT Cell Selector File   | GDOT\GDOTRoad\Cells | Revised  |

#### Macro Files Revised/Added

| File Modified | Description             | File Location        | Status  |
|---------------|-------------------------|----------------------|---------|
|               |                         | ·                    |         |
| DETEST.ba     | Detailed Estimate macro | GDOT\GDOTRoad\Macros | Revised |
|               |                         |                      |         |

### DGN Files Revised/Added

| File Modified      | Description                  | File Location | Status |
|--------------------|------------------------------|---------------|--------|
|                    |                              |               |        |
| UitilityLegend.dgn | GDOT Standard Utility Legend | 123456\DGN    | Added  |
|                    |                              |               |        |

### Video Files Revised/Added

| File Modified                     | Description                      | File Location     | Status |
|-----------------------------------|----------------------------------|-------------------|--------|
|                                   |                                  | ·                 |        |
| 4Show-Intro-to-GPLOT-Tools.avi    | Introduction Video for GPLOT     | GDOT\GDOTRoad\avi | Added  |
| 5Show-Reference-File-Info.avi     | Displays Border Tag Information  | GDOT\GDOTRoad\avi | Added  |
| 6Show-Edit-Submit-Device-List.avi | Demonstrates Device List Editing | GDOT\GDOTRoad\avi | Added  |
| 4.bat                             | Batch File to Run Camtasia Video | GDOT\GDOTRoad\avi | Added  |
| 5.bat                             | Batch File to Run Camtasia Video | GDOT\GDOTRoad\avi | Added  |
| 6.bat                             | Batch File to Run Camtasia Video | GDOT\GDOTRoad\avi | Added  |
|                                   |                                  |                   |        |

### 1-5 GENERAL INFORMATION

#### Term EDG

In places where EDG is mentioned in this document, unless otherwise stated, it represents an acronym for Electronic Data Guidelines and not the MicroStation EDG utility which is a graphics design file editor.

#### **English Units**

This document and the supporting CADD Standard files were written based upon Projects with English Units. Metric versions of these items will only be produced if the Department decides to start new projects in the Metric format.

#### **Reference Files**

The use of MicroStation reference files is required to prevent duplicate design information. Therefore, project design elements should exist in only one design file in most cases.

#### **Topography**

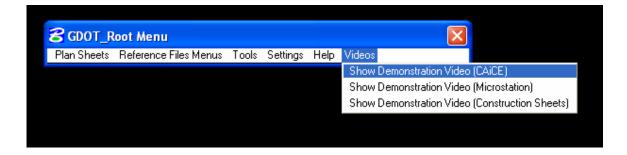

Only one topography file will exist for a project. Topography updates must be coordinated between the project manager and the SDE.

As a general rule, topography files will remain independent files and should not be modified. However, special situations may require manipulation of these files at the discretion of the project manager and may require coordination with the project SDE. Only topographic information should be included in topo files. No centerline information should be created or shown in the topography files.

#### **GDOT Root Menu**

The GDOT\_Root Menu was developed to minimize common repetitive tasks of the plan sheet development process. This menu also aids with compliance to the current GDOT EDG by automating many of the steps needed for reference file and level settings. Further development of this menu is ongoing and we welcome your feedback and suggestions.

For help with using the GDOT\_Root Menu, please see the videos which demonstrate the creation of the following files: MATCHLINE.dgn, SHEETLAYOUT.dgn, and a Construction and Utility plan sheet.

### 1-6 CURRENT DOT SOFTWARE VERSIONS

The current versions of major software used and accepted by the Georgia DOT are identified on the R.O.A.D.S. website:

http://www.dot.state.ga.us/dot/preconstruction/r-o-a-d-s/

All project deliverables must be submitted in CAiCE and Microstation software format. Technical support and documentation for CAiCE and Microstation versions other than the version identified on the R.O.A.D.S. website will not be provided by the Georgia DOT. The INI files, sheet commands, grid files, menus, workspaces, etc., provided by GDOT may not work for other versions.

MicroStation provides methods for exchanging select file types but data is often modified during the process. Improvements have been made and are being evaluated. If CADD software other than MicroStation J is used, those files should be converted to MicroStation J file format and thoroughly reviewed prior to transmitting to the department.

# 1-7 GUIDELINES FOR SUBMITTING ELECTRONIC DATA TO THE DEPARTMENT

All electronic data furnished to the GA DOT shall use the appropriate naming scheme and format for the type of data to be transmitted. It is very important to clearly communicate what is being transmitted and to describe the format of the transmitted files.

A letter is to be attached to **all submissions** stating briefly:

- 1. File content
- 2. File Format (zipped, XP, 2000, MicroStation, CAiCE etc. and the utility used)
- 3. CAiCE or MicroStation version (as identified on R.O.A.D.S. website)
- 4. Number of CDs.
- 5. Files must be in the proper format before transmitting to the DOT. No translating of information by DOT personnel shall be required.
- 6. If files are zipped or backed up, a brief explanation of the recommended procedure to extract the files should be included.
- 7. Versions of software must be current to or fully compatible with that of the GA DOT.
- 8. Each disk submitted shall be labeled and dated with a minimum of the PI# and date. If a series of disks are transmitted, the disk label shall also include the disk number and the total disks of that set, (ex: 1 of 10). Other subsequent disks shall be labeled so as to uniquely identify each group or set and shall include the sequence number followed by the total number in the group (ex: 2 of 10, 3 of 10, etc.)
- 9. The DOT reserves the right to reject any file transmitted that does not conform to these guidelines.

### **Deviation from Format**

Any file to be submitted that deviates from the above mentioned format must have prior DOT approval. The approval must be in writing with the name of the individual from the DOT who permitted the varying format.

### **Using Backup, Disks, and Compression**

In general, all files are to be furnished on one of the following in order of preference:

- 1) <u>CD's</u>
- 2) <u>FTP</u>

#### **Winzip**

If <u>data compression</u> is necessary, WINZIP will be the standard format used. The WINZIP executable shall be included with the transmitted files. If a file or a group of files is too large to be copied on a single diskette, then a zip disk or CD is recommended.

## 1-8 GRAPHIC STANDARDS

### **MicroStation**

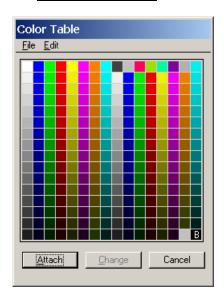

**Color Tables:** 

The Department has two acceptable Microstation color table formats:

GDOTcolor.tbl for use in plan file production.

GDOTDcolor.tbl for use in concept layouts (public displays).

#### **GDOTcolor.TBL**

#### GDOTDcolor.tbl

## **MicroStation**

## **Line Code:**

|    |   | 11 | =             | 0.060"   | 10                    |
|    |   | 12 | =             | 0.065"   | 11                    |
|    |   | 13 | =             | 0.070"   | 12                    |
|    |   | 14 | =             | 0.075"   | 13                    |
|    |   | 15 | =             | 0.080"   | 14                    |
|    |   | 10 | =             | 0.085"   | 15                    |

### **WEIGHT VS. THICKNESS**

\* NOTE: MicroStation weights range from 0 to 31. The resulting weight as shown above is not a MicroStation design file thickness value as viewed on the monitor screen, but is the measured width or thickness on a hardcopy plot from an output device such as a plotter. The resulting value may vary slightly in appearance or measured width due to plotter specific controls. A measured value of width or thickness as shown above is desired and must be obtained within a reasonable tolerance.

Experience indicates there is no problem meeting the above guideline for thickness and appearance. For that reason, a tolerance value is not specified. If upon review of plans submitted to the Department or submitted by another office of the Department, it is found that the line thickness, weight, or style does not meet the Departments guidelines, the Department shall reserve the right to reject those plans.

#### **MicroStation**

#### **User Defined Line Styles:**

The Department has created over 450 user defined line styles for use in displaying Utilities, Erosion Control Items, Guardrail, Fencing and many other linear displayed features. The only acceptable line styles that the Department will accept are those that the Department has provided. Any suggestions for future line styles should be submitted to the **Plan Presentation Committee.** 

#### **Email to:**

PPC@dot.state.ga.us

#### **Microstation - File Format**

From the MicroStation (IGDS) file type, the number of units of resolution are: 4,294,967,295 or 2 to the 32nd power +1.

The English Seed file is noted as GDOT2D.DGN and is different than the SEED2D.DGN provided with the MicroStation software. <u>The original SEED2D.DGN file provided with MicroStation should not be used for creating files for the DOT.</u>

### **English Units**

#### FOR ALL ENGLISH MICROSTATION FILES

MicroStation J file format is to be used for all CADD files submitted using the following working units:

Master Units: FT

Sub Units: th

Resolution: 1000 th per FT

Positional Units: 1 (Positional Units per th)

Working area of 4,294,967 FT square

The GDOT2D.dgn seed file has been set with a Global Origin as follows:

GO = 0.0

XY=-2147483647,-2147483647

This provides a design plane for a range in coordinate values (x,y) from (0,0) to (4,294,967.295,4,294,967.295). If coordinates are placed on or outside the design plane, a problem with the file will result.

### 1-9 MINIMUM TEXT SIZE FOR RIGHT OF WAY PLANS

#### **English Text Size Guidelines**

The minimum size for text on a set of English Right of Way plans and plans in general is to be 0.15 inches on the final D size plot.

Text information shown on Right of Way plan sheets should be placed at a minimum size of (0.15 X) the scale for the plans). Plans are usually done at 1 inch equals fifty feet (1"=50') which would equal a text size of 7.5ft  $(0.15 \times 50 = 7.5)$  or for 1 inch equals twenty feet (1"=20") which would equal a text size of 3.0ft  $(0.15 \times 20 = 3.0)$ .

#### NOTE ON WEIGHT FOR TEXT

It is important on small text to keep the weight to a maximum of weight=2 and preferably either weight 0 or 1. Heavier weights, especially numbers, when reduced to a small document will appear as blurred objects and are not legible.

### Why the minimum size and weight for text

A minimum text size on Right of Way plans must be followed for several reasons. The most important is the requirement for filing legible courthouse documents, deeds, etc. Plans, or selected areas of plans are often reduced to a letter size document to provide the legal description to be filed in the courthouse as the final document. The minimum text size guideline was established to meet the need of this requirement.

There are situations where the text size may be smaller but this generally applies to construction plans. The final output is also dependent on the device used for generating the final plot or hardcopy. The above guideline for text size considered these factors and more when selecting the size.

### 1-10 FILE CONVERSION -- Metric / English

When converting meters to feet and extreme accuracy is needed, use the conversion factor for U.S. Survey Feet rather than the slightly different factor for the International Foot. The factors are as follows:

#### **U.S. Survey Feet (GA DOT plans)**

For conversion of meters to U.S. Survey Feet, multiply the meters by 39.37 divided by 12 which is 3.28083333333 to 12 significant figures.

To further explain: using 1 meter = 39.37 inches, and converting to meters per feet, ((1 m/39.37 ") x (12 "/ft)) = 0.3048006096012 m/ft or rounding for a factor of 0.3048

#### **International Feet**

For conversion of meters to International Feet, multiply the meters by 100.0 divided by 30.48 which is 3.28083989501 to 12 significant figures.

To further explain: using 25.4 millimeters = 1 inch, and converting to meters per feet,

((25.4 mm / 1 ") x (12 " / ft) x (m / 1000 mm)) = 0.3048000000000 m/ft or rounding for a factor of 0.3048

### 1-11 SAVING VIEWS IN MICROSTATION FOR PLOTTING

#### **Problem:** Recalling information to plot

When design files are provided for review, modification, revision, etc., the personnel viewing or modifying the design files cannot easily determine which reference files were attached or what levels were displayed in producing the final hardcopy plot.

### **Solution:** Super Saved Views

For each sheet file and all major files for which a plot is created from, a Super Saved View called **GPLOT** should be created that contains the exact levels displayed for the active file and all reference files attached which produce the final plot.

Once the file is rotated on the screen correctly, view attributes set correctly, all files attached with appropriate levels displayed and all reference files clipped, the user can either use the GDOT\_Root Menu command, Save Super View GPLOT or key-in MACRO SV GPLOT to save the view. This will create a file with the prefix the same as the design file plus the following extension \_GPLOT.svb.

Example 123456CP01\_GPLOT.svb

These .svb files should be included in any submission of project plans to department personnel.

For example, assuming the design file 123456CP01.DGN for mainline will be opened in MicroStation for review or modification and the plotting information was saved in a Super Saved View named GPLOT, the reviewer would open the design sheet file in MicroStation by either accessing the GDOT\_Root Menu and selecting *Recall Super View GPLOT* or by the key-in MACRO VI GPLOT. This should display the file exactly as it appeared when the Super Saved View of GPLOT was created.

The two macros SV and VI are provided with the Georgia DOT Microstation download.

### **1-12 FILE LOCATIONS**

### **USING PI # FOR SUBDIRECTORY**

The P.I.# less the first character followed by four characters shall be used to describe the type of MicroStation design file.

Assuming the drive letter C:\ is used as the root directory and a PI Number of 0001234 is the active project, the first number of the PI number, 0 for this project, should be dropped and the appropriate file type added. The resulting file prefix would now be the <u>6 digit number</u> 001234 plus the 4 character description.

Example: 001234MAIN.dgn for the main design file.

This naming convention allows many of the processes in attaching reference files to be automated. The <u>6 digit number prefix</u> must be used in order for these automation tools to function properly.

All design file names must use the 6 digit PI Number as part of the file name with the exception of the **Sheetlayout.dgn** and the **Matchline.dgn** files.

All MicroStation files should be located in a subdirectory of the PI Number named \DGN\.

Example: C:\001234\DGN

Note: Microstation reference files should be attached without the Save Full path option on. By following the conventions set forth in the file names and their locations, the project will work whether or not a drive letter changes due to the transfer of files.

CAiCE Archive files should be stored in a subdirectory of the PI Number named \CAiCE\.

Example: C:\123456\CAiCE

### 1-13 MISCELLANEOUS ITEMS

A clipped boundary should be placed so that a match line is created for the adjacent sheets to be plotted. This minimizes the possibility for duplication of data between plan sheets.

It is recommended to display levels on a final plot as illustrated later in these guidelines. This will help ensure consistency as well as assist in the automation of procedures. As with any document there may be items that have not been addressed and the project designer will need to make the final determination of level display for each sheet. <u>Documentation must be provided for information placed in Microstation files that are not listed in Sections 2-4 and 2-6.</u>

Documentation of procedures and project history should be maintained in a project log file.

### 1-13 MISCELLANEOUS ITEMS

A clipped boundary should be placed so that a match line is created for the adjacent sheets to be plotted. This minimizes the possibility for duplication of data between plan sheets.

It is recommended to display levels on a final plot as illustrated later in these guidelines. This will help ensure consistency as well as assist in the automation of procedures.
