

**DEPARTMENT OF TRANSPORTATION
STATE OF GEORGIA**

REFERENCE SOFTWARE FOR SOIL SURVEYS

The following is a list of some of the computer software used by the Geotechnical Environmental Pavement Bureau in the preparation of soil surveys. Note that some of these programs must be purchased from private vendors, while others are in the public domain:

Program

1. WinStabl
2. StrataSlope
3. Pipe Materials
4. SETTLE

Application

- Slope Stability Analysis
- Reinforced Slope Design
- Selection of allowable pipe culvert materials
- Settlement Analysis

Programs not listed above may be used, however the Department reserves the right to have the output validated.
