OpenRoads Survey Codes

5/7/2021

Revision 1.2

Atlanta, Georgia 30308

This document was developed as part of the continuing effort to provide guidance within the Georgia Department of Transportation in fulfilling its mission to provide a safe, efficient, and sustainable transportation system through dedicated teamwork and responsible leadership supporting economic development, environmental sensitivity and improved quality of life. This document is not intended to establish policy within the Department, but to provide guidance in adhering to the policies of the Department.

Your comments, suggestions, and ideas for improvements are welcomed.

Please send comments to:

State Design Policy Engineer

One Georgia Center
600 W. Peachtree Street, 26th Floor
Atlanta, Georgia 30308

DISCLAIMER

The Georgia Department of Transportation maintains this printable document and is solely responsible for ensuring that it is equivalent to the approved Department guidelines.

Revision Summary

Date	Revision Number	Description
XX-XX-2020	1.00	DRAFT
2-17-2021	1.10	Separated Field Survey codes from Non-Field Survey Codes. Non-Field Survey Codes are now list at the bottom of the list in a separate section. This is to ensure Non-Field Survey codes do not end up in the field book.
5/7/2021	1.20	Added back the feature codes U UWSP, U UWV and U UWVMRK. These codes were accidentally removed during the 2-17-2021 edit.

GDOT Standard OpenRoads Field Survey Feature Codes

The following table is for informational use only so that the Designer and SDE will have a reference for the Field Survey Feature Codes if needed. This table lists associated **OpenRoads Alpha Codes** and **Feature Definitions** for use in Field Survey collection as opposed to Survey Codes used in the office for property creation or for stakeout. See the bottom of this document for a complete list of codes used in the office for property creation or for stakeout. The **Point or Chain Type** and **Triangulate (Yes/No)** columns denote whether a feature is a Point or Chain Type and whether it is triangulated or not triangulated in the DTM Surface. **These parameters should never be changed**, with the one exception of the Exterior Boundary when the Feature Type needs to be changed from Breakline to Boundary (feature style TOPO_E_TLIML). GDOT provides Surveyor-Defined options for features not listed or when different parameters are required. Features that have “(DIM.)” included in the description require dimensional attributes to be entered (see last page for summary list).

Description	ORD Alpha Code	ORD Feature Definition	Point or Chain Type	Triangulate (Y/N)
Property and Right-of-Way				
RIGHT-OF-WAY MARKER FOUND	RWM	PROP_E_RWM	Point	N
RAILROAD RIGHT-OF-WAY MARKER FOUND	RWRR	PROP_E_RWRR	Point	N
