## Submit Electronic Signature (DocuSign)

After the initial GDOT review is complete, the applicant will receive an email with a link to DocuSign. DocuSign is an electronic signature service used to capture signatures. There are several instances when a signature is needed in the permit application process.

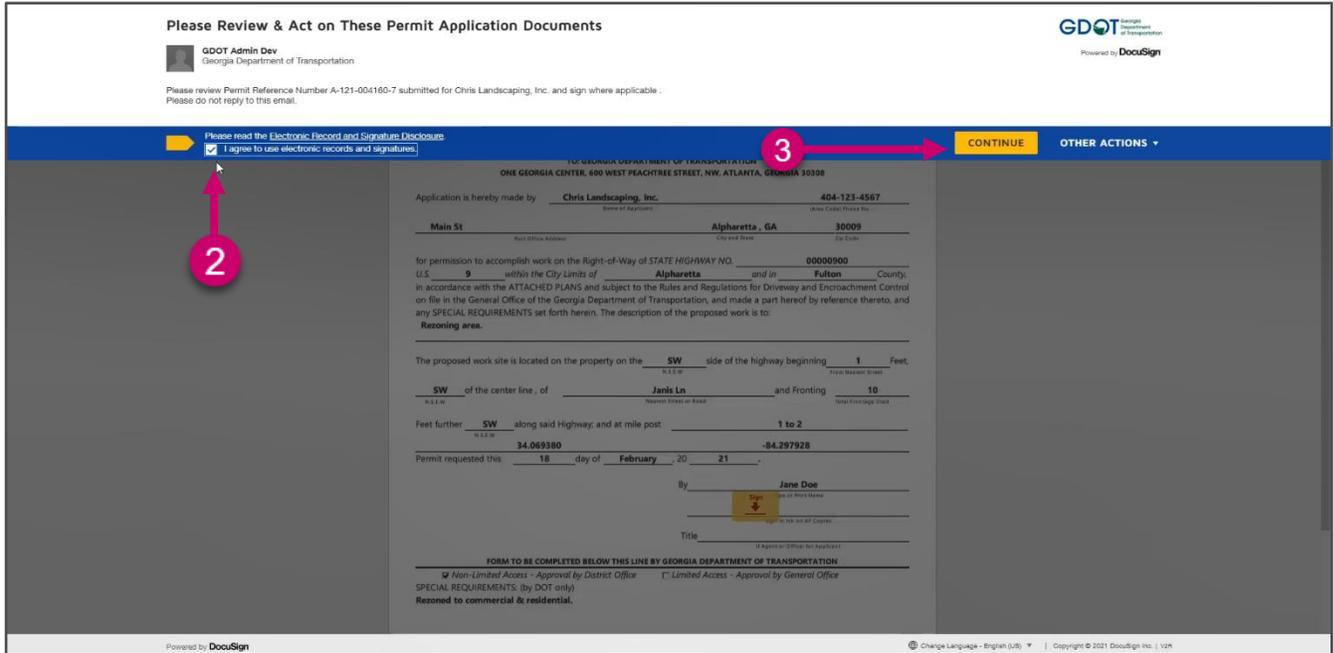

The first instance when a signature is needed is when the applicant signs the application.

1. From the email, select **REVIEW DOCUMENT**.

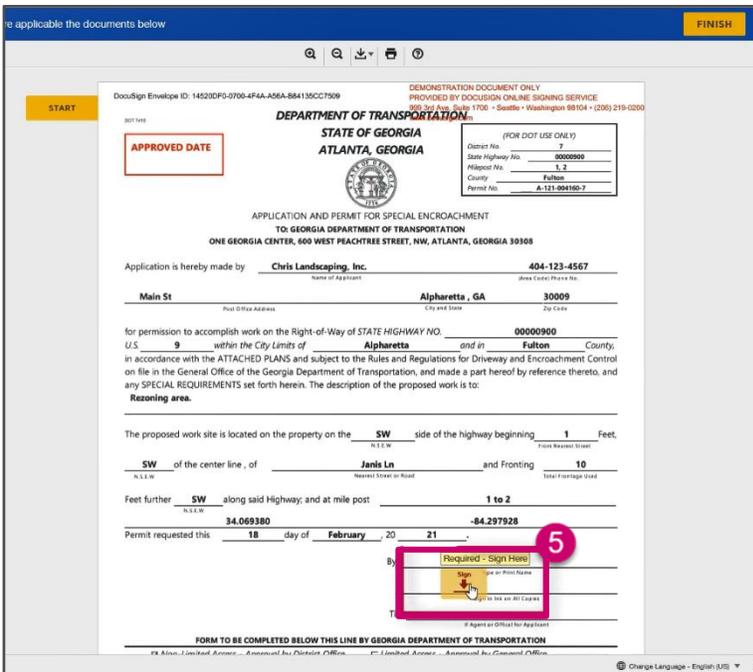

# GPAS – Access Permits External

- The first step while using DocuSign is to select the checkbox: **I agree to use electronic records and signatures.**
- Select **CONTINUE**.

- Based on the permit information, the system generates the Permit form. Carefully review the details.
- If all is correct, select **Sign**.

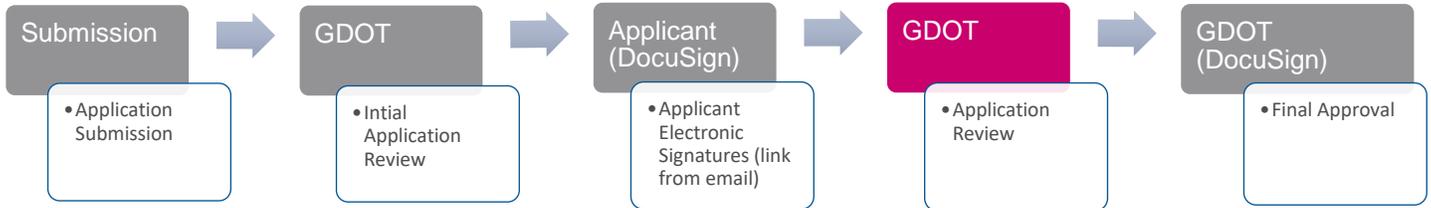

!

**For all permit applications:** the only way to access DocuSign to sign the application is from the link sent to the email address on file. Therefore, it is very important that the correct email address is listed in the My Profile section and that this email account is accessed frequently.
