

Project Overview

GDOT and the City of Atlanta have identified the need for safety improvements for pedestrians, bicyclists, and drivers on State Route (SR) 8/US 278/Donald Lee (D.L.) Hollowell Parkway. From 2013 to 2021, there were a total of 1,906 crashes, including five fatal pedestrian crashes, on the section of D.L. Hollowell Parkway from SR 280/James Jackson Parkway/Hamilton E. Holmes Drive to Stiff Street.

GDOT and the City of Atlanta are collaborating on a traffic calming project on State Route (SR) 8/US 278/Donald Lee (D.L.) Hollowell Parkway from SR 280/James Jackson Parkway/Hamilton E. Holmes Drive to Stiff Street, with the goal of promoting safety for all roadway users by reducing vehicle speeds. This section of D.L. Hollowell Parkway is currently a four-lane road with two lanes in each direction and no median. The proposed project is designed to:

- Convert D.L. Hollowell Parkway to a three-lane road, with one lane in each direction and a center two-way left turn lane. Medians will be used in certain locations to improve safety for crossing pedestrians.
- Reduce the total number of crashes on this section of D.L. Hollowell Pkwy by 37%, with the potential for a larger decrease by creating space within the existing right-of-way for potential future improvements.

Completed Milestones

Environmental Approval

The environmental document for the project was approved on December 2, 2022. Approval of the document completes the environmental approval process required to advance the project to construction.

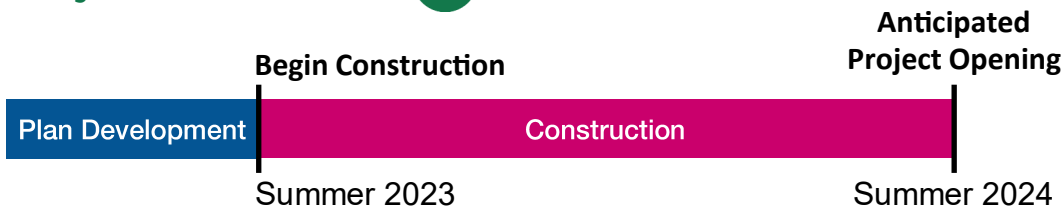

Public Involvement

The project team presented at two Neighborhood Association meetings in the past few months, visiting Center Hill on January 5 and Grove Park on April 4. The team was able to update attendees on the status of the project, answer questions, and gather input.

Project Let

As of March 2023, plan development has been completed, and GDOT is in the process of procuring a contractor for construction.

Project Schedule

Public Involvement

The project team will continue to share project updates at local neighborhood association and NPU-J meetings, in project newsletters, and via social media.
